kalamazoo spring break: *The Melting Pot, Hot/Cold?* Freddie L. Richards Sr., 2023-04-20 There are some parts of life in the United States that are very important for what they are mandated and supposed to do, and this book is written to describe how the life and career of an individual from an agricultural background that goes back to childhood and who was somewhat guided and highly self-motivated to serve within this area interacts with the bureaucracy at all levels of state educational institutions and the richly financially invested programs of the federal government through the US Department of Agriculture. He did not write this as a negative endeavor but as a viewable summary of worthwhile accomplishments that may or may not have been institutionalized by anyone except the author. There are family ancestral lineages that are listed that may include the name of any person in the lifetime of the author that will never be told, and maybe if that person hears of or reads this book, he will be motivated to tell the story of his family and his career, and it too will become a part of told USA history. Additionally, the writer believes this text at personal and professional levels may be of interest to the vast organizations listed above whose staff interact daily with people such as the author but only know their single area of responsibility. There are also incidents in the author's life that are listed and implied that would have caused major problems if there had not been the support of people who acted as if they owed my ancestors some type of debt. However, the author acted in his career like he worked at the "number 1" institution in the USA and performed projects and sent students on global journeys to increase their family and career success. There were times when the author's opportunities seemed to be conflicted with general institutional and agency leadership, and most of these times, they were no different from what was being done at other similar locations, but with which way would the recognition start and flow.

kalamazoo spring break: *Breaking Glass - Broken Barriers* Joyce Verplank Hatton, 2018-05-29 Joyce Verplank Hatton's life has embraced community and political leadership, entrepreneurial success, love and family, and worldwide sailing adventures. Writing with courage and candor, she shares her life's journey following a trail from a small harbor town on Lake Michigan to Aspen Colorado, New York City, Washington, D.C., and beyond, while skiing the Rockies and sailing the Caribbean. Hatton's entrepreneurial drive became evident in 1957 when she

developed the first nursery school in Western Michigan, the first child care company to go public in 1970, and the first multi-state computerized USDA child care food program in 1976. Encouraged by a supportive family and a dynamic mentor, Hatton also established herself in media ventures that included FM radio, UHF television, and cable networks. Hatton brought her leadership experience to state and national politics as well: she was a candidate for Michigan's new State Board of Education in 1964, Republican County Chairman in President Gerald Ford's Fifth District, and a delegate to the 1968 GOP national convention in Miami. And she logged over a decade of ocean sailing, charting the course with a talented lifelong sailor. In this personal narrative, Hatton hopes to encourage other women to value independent economic status, be entrepreneurial, take risks, and march to their own drum.

kalamazoo spring break: Nagai Kafū's Occidentalism Rachael Hutchinson, 2011-11-01 Nagai Kafū (1879-1959) spent more time abroad than any other writer of his generation, firing the Japanese imagination with his visions of America and France. Applying the theoretical framework of Occidentalism to Japanese literature, Rachael Hutchinson explores Kafū's construction of the Western Other, an integral part of his critique of Meiji civilization. Through contrast with the Western Other, Kafū was able to solve the dilemma that so plagued Japanese intellectuals—how to modernize and yet retain an authentic Japanese identity in the modern world. Kafū's flexible positioning of imagined spaces like the West and the Orient ultimately led him to a definition of the Japanese Self. Hutchinson analyzes the wide range of Kafū's work, particularly those novels and stories reflecting Kafū's time in the West and the return to Japan, most unknown to Western readers and a number unavailable in English, along with his better-known depictions of Edo's demimonde. Kafū's place in Japan's intellectual history and his influence on other writers are also discussed.

kalamazoo spring break: *Comforts of the Abyss: The Art of Persona Writing* Philip Schultz, 2022-06-07 A vivid, intimate, and inspiring exploration of how to write through persona, from the Pulitzer Prize-winning founder of an influential writing school. Throughout his growth as a writer, acclaimed poet Philip Schultz has battled with the dark voice in his head—the “shitbird,” as his late friend the poet Ralph Dickey termed it—that whispers his insecurities and questions his ability to create. Persona writing, a method of borrowing the voice and temperament of accomplished writers, offers him imaginative distance and perspective on his own negative inclinations. In this candid and generous book, Schultz reflects on his early life in an immigrant neighborhood of upstate New York, his first writing experiments inspired by Ernest Hemingway and John Keats, his struggles with dyslexia, and the failures he witnessed in his father’s life and his own. Through surprising, sometimes humorous, and encouraging encounters with the writers who influence him—including Elizabeth Bishop, Joan Didion, and Norman Mailer—as well as moving experiences of loss, Schultz learns how to fashion personas out of pain. Perceptive, enlightening, and profound, *Comforts of the Abyss* reveals how persona writing can be used as a tool for unlocking a writer’s own story, the philosophy on which Schultz founded The Writers Studio in 1987.

It began with the simple goal of providing our children and grandchildren with a short history of the Demlow family and, specifically, the author’s experiences on the family farm in the 1950s. But it didn’t end there: the book took on a life of its own as it grew to include the Moeller, Ganun, and Roekle families as well as historical tidbits from the 1880s to the present.
