kings island education days 2023: My Tongue is My Own: A Life of Gwen Harwood Ann-Marie Priest, 2020-11-17 A masterful portrait of a major Australian writer, her incandescent poetry and her battles to be heard in a male-dominated literary establishment. Winner of the 2023 National Biography Award The first biography of Gwen Harwood (1920-1995), one of Australia's most significant and distinctive poets. Harwood is renowned for her brilliance, but loved for her humour, rebellion and mischief. A public figure by the end of her life, she was always deeply protective of her privacy, and even now, some twenty-six years after her death, little is known of the experiences that gave rise to her extraordinary poems. This book follows Harwood from her childhood in 1920s Brisbane to her final years in Hobart in the 1990s. It traces how a lively, sardonic and determined young woman built a career in the conservative 1950s, blasting her way into the patriarchal strongholds of Australian poetry. Harwood refused to be bound by convention, 'liberating' herself, to use her word, before women's lib existed. Yet she also struggled for much of her life to combine marriage and motherhood with her creative ambitions. In this sense, she is a twentieth-century everywoman. She is also a unique and powerful presence in Australian literary history, a poet who challenged orthodoxies and spoke in a remarkable range of voices. This illuminating, moving biography reveals a deeply passionate figure both at odds with her time and deeply of it, and reclaims and celebrates this important Australian writer. 'Gwen Harwood, that excellent poet and critic, deserves a sympathetic and lively biography. Ann-Marie Priest, to her credit, has just written that book.' —Ann Blainey, winner of 2009 National Biography Award 'Read this meticulous biography with Harwood's poetry in hand, and chase down every poem that Priest cites.' —The Sydney Morning Herald 'Ann-Marie Priest has captured completely the sprite-like nature of one of Australia's finest poets... Through these pages, the great poet feels so alive.' —Judges comments, National Biography Award

kings island education days 2023: The Power of Oral History Narratives Toni Fuss Kirkwood-Tucker, Frans H. Doppen, 2023-06-01 The significance of this book is its uniqueness. First, the book contains a collection of fourteen chapters that capture the personal, professional, and historical experiences of international global scholars and artists to which they were subjected in their native country and after they immigrated to the United States. What makes this book project highly unusual in comparison to other publications is that these international global scholars and artists experienced historical events of trauma and joy in their native country and in their newly adopted country of the United States that lie deeply buried in their sub-consciousness; that these memories are unforgettable and still painful for them; that these memories are a constant companion in their daily lives; and that the experienced historical events of trauma and joy have shaped their professional and personal lives to this very day. There exists a paucity in the global education literature of this far-reaching topic and, thus, it has the potential to enhance and diversify the global education literature. Second, the significance of this book lies in the pedagogical power of the oral history narrative tradition and its impact on students at the secondary and tertiary levels in education. When one's lived experiences of trauma or joy occur during a critical time in history, they rarely yield unforgotten memories and deeply held private knowledge that do not come to light without a storyteller. When first-hand accounts are shared publicly, they can bring powerful insights into past historic events to the very presence. Thus, the pedagogical strength of this book contributes to knowledge creation in the classroom as oral histories move students from abstract textbook descriptions to concrete and compelling "lived" stories associated with historical happenings. This pedagogy leads students to become more critical of historical events of the past and develops in them a deeper understanding of the past. Consequently, oral history narratives enable teachers and teacher educators to enrich the abstract text of textbooks with the authentic voice of the individual. A third significance of this book lies embedded in the rich historical perspective displayed by storytellers of non-native international global scholars and artists from around the world who portray their lived-through, first-hand experiences such as child labor, communism, hate, hunger, fascism, fear, intolerance, discrimination, prejudice, poverty, war, protest, and death. Finally, a major purpose of this book is to expose young learners from around the

world to empowering non-native international role models in global education and the arts from nations in Africa, Asia, the Caribbean, Eurasia, Europe, the Middle East, and South America who build bridges—not walls—between peoples and nations.

kings island education days 2023: Code Name Blue Wren Jim Popkin, 2023-01-03 *An Amazon Best Book of 2023* *An Apple Book of the Month for January* The incredible true story of Ana Montes, the most damaging female spy in US history, drawing upon never-before-seen material and to be published upon her release from prison, for readers of Agent Sonya and A Woman of No Importance. Just days after the 9-11 attacks, a senior Pentagon analyst eased her red Toyota Echo into traffic and headed to work. She never saw the undercover cars tracking her every turn. As she settled into her cubicle on the 6th floor of the Defense Intelligence Agency in Washington, FBI Agents and twitchy DIA officers were hiding in nearby offices. For this was the day that Ana Montes--the US Intelligence Community superstar who had just won a prestigious fellowship at the CIA--was to be arrested and publicly exposed as a secret agent for Cuba. Like spies Aldrich Ames and Robert Hanssen before her, Ana Montes blindsided her colleagues with brazen acts of treason. For nearly 17 years, Montes succeeded in two high-stress jobs. By day, she was one of the government's top Cuba experts, a buttoned-down GS-14 with shockingly easy access to classified documents. By night, she was on the clock for Fidel Castro, listening to coded messages over shortwave radio, passing US secrets to handlers in local restaurants, and slipping into Havana wearing a wig. Montes didn't just deceive her country. Her betrayal was intensely personal. Her mercurial father was a former US Army Colonel. Her brother and sister-in-law were FBI Special Agents. And her only sister, Lucy, also worked her entire career for the Bureau. The highlight of her distinguished 31 years as a Miami-based language specialist: Helping the FBI flush Cuban spies out of the United States. Little did Lucy or her family know that the greatest Cuban spy of all was sitting right next to them at Thanksgivings, baptisms, and weddings. In *Code Name Blue Wren*, investigative journalist Jim Popkin weaves the tale of two sisters who chose two very different paths, plus the unsung heroes who had to fight to bring Ana to justice. With exclusive access to a "Secret" CIA behavioral profile of Ana, family memoirs, and Ana's incriminating letters from prison, Popkin reveals the making of a traitor—a woman labelled "one of the most damaging spies in U.S. history" by America's top counter-intelligence official. After more than two decades in federal prison, Montes will be freed in January 2023. *Code Name Blue Wren* is a thrilling detective tale, an insider's look at the clandestine world of espionage, and an intimate exploration of the dark side of betrayal.

kings island education days 2023: Fighting for the French Foreign Legion Nils Elmark, 2023-08-03 On 24 August 1914, forty-four Americans joined the Foreign Legion and “with a cowboy swing” marched through Paris, wildly cheered by the crowd. They were Ivy League graduates, artists and dreamers and soldiers of fortune starting on equal terms as recruits in the French Army. They were the first Americans in the Great War, driven by a love for France and a thirst for adventure with no idea of the horrors awaiting them. This book is the amazing story of these American legionnaires told by three of the young volunteers: • David Wooster King – a 21-year-old dropout from Harvard, son of a rich businessman. King survived four years in the trenches ending as an officer in the US Army chasing German spies in Switzerland. He became a modern global adventurer and when the world went to war again David King was the first to volunteer for an even greater adventure in North Africa. • Alan Seeger – a 26-year-old poet and dreamer from a New York family of intellectuals. Seeger was killed during the Battle of the Somme on 4 July 1916. Six weeks earlier, he wrote the famous poem, ‘I Have a Rendezvous with Death’ which was to become his legacy and the favorite poem of President Kennedy. It has inspired a line of American presidents

during the 20th century and is an indestructible poetic lifeline linking France and the United States of America. • Eugene James Bullard – the last of the three legionnaires and a 19-year-old entertainer and boxer from Columbus, Georgia. His father was born a slave, his mother was Creek Indian. Although wounded at Verdun and invalided out of the French Army, Bullard became the world's first black aviator. After the war he settled in Paris and ran a bar in Montmartre before going to war for France again in 1940. The three men represent different pillars of the American soul, and their lives and dreams symbolize the story of how America became modern and remind us of the strong historic ties between France and America. Most of all, this book is a fantastic saga of brave men, great adventures and terrific sacrifices that bring hope and a new direction in a time of human division.

kings island education days 2023: Fashion as Creative Economy Daniel Strutt, Angela McRobbie, Carolina Bandinelli, 2022-11-29 Fashion is under the spotlight like never before. Activists call for environmental accountability, and wide-ranging debates highlight exploitation across global supply chains and the reliance on unpaid labour. Digital technology undermines traditional fashion companies, while small-scale independent fashion designers provide radical innovations in design and work in more socially inclusive ways. This book contributes to a new sociology of fashion. Focusing on the working lives of independent designers and based on ethnographic research and interviews carried out in London, Berlin and Milan, the authors consider the urban policy regimes in place in these cities. They analyse how these regimes shape the microenterprises and the emerging political economy, as well as the structures needed for designers to flourish. They also develop several key concepts – the 'milieu of fashion labour', 'social fashion' and 'fashion diversity' – and chart the new world of digital fashion-tech and e-commerce. Drawing on lessons from European initiatives and recognizing the capacity of microenterprises and start-ups to determine fashion's future, the authors call for the industry to be significantly decentralized to ensure more diversity and less exclusivity.
