milady s nail technology workbook answer key: The Managed Hand Miliann Kang, 2010-06-02 Two women, virtual strangers, sit hand-in-hand across a narrow table, both intent on the same thing-achieving the perfect manicure. Encounters like this occur thousands of times across the United States in nail salons increasingly owned and operated by Asian immigrants. This study looks closely for the first time at these intimate encounters, focusing on New York City, where such nail salons have become ubiquitous. Drawing from rich and compelling interviews, Miliann Kang takes us inside the nail industry, asking such questions as: Why have nail salons become so popular? Why do so many Asian women, and Korean women in particular, provide these services? Kang discovers multiple motivations for the manicure-from the pampering of white middle class women to the artistic self-expression of working class African American women to the mass consumption of body-related services. Contrary to notions of beauty service establishments as spaces for building community among women, The Managed Hand finds that while tentative and fragile solidarities can emerge across the manicure table, they generally give way to even more powerful divisions of race, class, and immigration.

Valencia, 1991 This book examines the school failure and success of Chicano students from a wide variety of perspectives. It attempts to promote further understanding of what constitutes, maintains, and helps shape school failure among Chicano students, and to present research and policy agendas that may help to realize Chicano school success. Five sections address current realities of the Chicano schooling experience, language and classroom perspectives on Chicano achievement, cultural and familial perspectives on achievement, educational testing and special education issues, and the big picture and Chicano school failure. Chapters are: (1) The Plight of Chicano Students: An Overview of Schooling Conditions and Outcomes (Richard R. Valencia); (2) Segregation, Desegregation, and Integration of Chicano Students: Problems and Prospects (Ruben Donato, Martha Menchaca, Richard R. Valencia); (3) Chicano Dropouts: A Review of Research and Policy Issues (Russell W. Rumberger); (4) Bilingualism, Second Language Acquisition, and the Education of Chicano Language Minority Students (Eugene E. Garcia); (5) Promoting School Success for Chicanos: The View from Inside the Bilingual Classroom (Barbara J. Merino); (6) From Failure to Success: The Roles of Culture and Cultural Conflict in the Academic Achievement of Chicano Students (Henry T. Trueba); (7) Cognitive Socialization and Competence: The Academic Development of Chicanos (Luis M. Laosa, Ronald W. Henderson); (8) The Uses and Abuses of Educational Testing: Chicanos as a Case in Point (Richard R. Valencia, Sofia Aburto); (9) An Analysis of Special Education as a Response to the Diminished Academic Achievement of Chicano Students (Robert Rueda); (10) Systemic and Institutional Factors in Chicano School Failure (Arthur Pearl); and (11) Conclusions: Towards Chicano School Success (Richard R.
