parallel journeys pdf: Command Of The Air General Giulio Douhet, 2014-08-15 In the pantheon of air power spokesmen, Giulio Douhet holds center stage. His writings, more often cited than perhaps actually read, appear as excerpts and aphorisms in the writings of numerous other air power spokesmen, advocates and critics. Though a highly controversial figure, the very controversy that surrounds him offers to us a testimonial of the value and depth of his work, and the need for airmen today to become familiar with his thought. The progressive development of air power to the point where, today, it is more correct to refer to aerospace power has not outdated the notions of Douhet in the slightest. In fact, in many ways, the kinds of technological capabilities that we enjoy as a global air power provider attest to the breadth of his vision. Douhet, together with Hugh "Boom" Trenchard of Great Britain and William "Billy" Mitchell of the United States, is justly recognized as one of the three great spokesmen of the early air power era. This reprint is offered in the spirit of continuing the dialogue that Douhet himself so perceptively began with the first edition of this book, published in 1921. Readers may well find much that they disagree with in this book, but also much that is of enduring value. The vital necessity of Douhet's central vision—that command of the air is all important in modern warfare—has been proven throughout the history of wars in this century, from the fighting over the Somme to the air war over Kuwait and Iraq.

parallel journeys pdf: Ant Colony Optimization Marco Dorigo, Thomas Stutzle, 2004-06-04 An overview of the rapidly growing field of ant colony optimization that describes theoretical findings, the major algorithms, and current applications. The complex social behaviors of ants have been much studied by science, and computer scientists are now finding that these behavior patterns can provide models for solving difficult combinatorial optimization problems. The attempt to develop algorithms inspired by one aspect of ant behavior, the ability to find what computer scientists would call shortest paths, has become the field of ant colony optimization (ACO), the most successful and widely recognized algorithmic technique based on ant behavior. This book presents an overview of this rapidly growing field, from its theoretical inception to practical applications, including descriptions of many available ACO algorithms and their uses. The book first describes the translation of observed ant behavior into working optimization algorithms. The ant colony metaheuristic is then introduced and viewed in the general context of combinatorial optimization. This is followed by a detailed description and guide to all major ACO algorithms and a report on current theoretical findings. The book surveys ACO applications now in use, including routing, assignment, scheduling, subset, machine learning, and bioinformatics problems. AntNet, an ACO algorithm designed for the network routing problem, is described in detail. The authors conclude by

summarizing the progress in the field and outlining future research directions. Each chapter ends with bibliographic material, bullet points setting out important ideas covered in the chapter, and exercises. Ant Colony Optimization will be of interest to academic and industry researchers, graduate students, and practitioners who wish to learn how to implement ACO algorithms.

parallel journeys pdf: Ottoman Explorations of the Nile Robert Dankoff, Nuran Tezcan, Michael D. Sheridan, 2018-02-15 Before the time of Napoleon, the most ambitious effort to explore and map the Nile was undertaken by the Ottomans, as attested by two monumental documents: an elaborate map, with 475 rubrics, and a lengthy travel account. Both were achieved at about the same time—c. 1685—and both by the same man. Evliya Çelebi's account of his Nile journeys, in the tenth volume of his Book of Travels (Seyahatname), has been known to the scholarly world since 1938, when that volume was first published. The map, held in the Vatican Library, has been studied since at least 1949. Numerous new critical editions of both the map and the text have been published over the years, each expounding upon the last in an attempt to reach a definitive version. The Ottoman Explorations of the Nile provides a more accurate translation of the original travel account. Furthermore, the maps themselves are reproduced in greater detail and vivid color, and there are more cross-references to the text than in any previous edition. This volume gives equal weight and attention to the two parts that make up this extraordinary historical document, allowing readers to study the map or the text independently, while also using each to elucidate and accentuate the details of the other.

parallel journeys pdf: Kamishibai Man Allen Say, 2005-10-24 The Kamishibai man used to ride his bicycle into town where he would tell stories to the children and sell them candy, but gradually, fewer and fewer children came running at the sound of his clappers. They were all watching their new televisions instead. Finally, only one boy remained, and he had no money for candy. Years later, the Kamishibai man and his wife made another batch of candy, and he pedaled into town to tell one more story—his own. When he comes out of the reverie of his memories, he looks around to see he is surrounded by familiar faces—the children he used to entertain have returned, all grown up and more eager than ever to listen to his delightful tales. Using two very different yet remarkable styles of art, Allen Say tells a tale within a tale, transporting readers seamlessly to the Japan of his memories.

parallel journeys pdf: The Field Guide to Human Error Investigations Sidney Dekker, 2017-11-01 This title was first published in 2002: This field guide assesses two views of human error - the old view, in which human error becomes the cause of an incident or accident, or the new view, in which human error is merely a symptom of deeper trouble within the system. The two parts of this guide concentrate on each view, leading towards an appreciation of the new view, in which human error is the starting point of an investigation, rather than its conclusion. The second part of this guide focuses on the circumstances which unfold around people, which causes their assessments

and actions to change accordingly. It shows how to reverse engineer human error, which, like any other component, needs to be put back together in a mishap investigation.

parallel journeys pdf: Slave Songs of the United States William Francis Allen, Charles Pickard Ware, Lucy McKim Garrison, 1996 Originally published in 1867, this book is a collection of songs of African-American slaves. A few of the songs were written after the emancipation, but all were inspired by slavery. The wild, sad strains tell, as the sufferers themselves could, of crushed hopes, keen sorrow, and a dull, daily misery, which covered them as hopelessly as the fog from the rice swamps. On the other hand, the words breathe a trusting faith in the life after, to which their eyes seem constantly turned.

parallel journeys pdf: The Adult Learner Malcolm S. Knowles, Elwood F. Holton III, Richard A. Swanson, RICHARD SWANSON, Petra A. Robinson, 2020-12-20 How do you tailor education to the learning needs of adults? Do they learn differently from children? How does their life experience inform their learning processes? parallel journeys pdf: Facing East from Indian Country Daniel K. Richter, Director of the McNeil Center for Early American Studies Daniel K Richter, 2009-06-01 In the beginning, North America was Indian country. But only in the beginning. After the opening act of the great national drama, Native Americans yielded to the westward rush of European settlers. Or so the story usually goes. Yet, for three centuries after Columbus, Native people controlled most of eastern North America and profoundly shaped its destiny. In *Facing East from Indian Country*, Daniel K. Richter keeps Native people center-stage throughout the story of the origins of the United States. Viewed from Indian country, the sixteenth century was an era in which Native people discovered Europeans and struggled to make sense of a new world. Well into the seventeenth century, the most profound challenges to Indian life came less from the arrival of a relative handful of European colonists than from the biological, economic, and environmental forces the newcomers unleashed. Drawing upon their own traditions, Indian communities reinvented themselves and carved out a place in a world dominated by transatlantic European empires. In 1776, however, when some of Britain's colonists rebelled against that imperial world, they overturned the system that had made Euro-American and Native coexistence possible. Eastern North America only ceased to be an Indian country because the revolutionaries denied the continent's first peoples a place in the nation they were creating. In rediscovering early America as Indian country, Richter employs the historian's craft to challenge cherished assumptions about times and places we thought we knew well, revealing Native American experiences at the core of the nation's birth and identity.

parallel journeys pdf: Speculative Everything Anthony Dunne, Fiona Raby, 2013-12-06 How to use design as a tool to create not only things but ideas, to speculate about possible futures. Today designers often focus on making technology easy to use, sexy, and consumable. In *Speculative Everything*, Anthony Dunne and Fiona Raby propose a kind of design that is used as a tool to create not only things but ideas. For them, design is a means of speculating about how things could be—to imagine possible futures. This is not the usual sort of predicting or forecasting, spotting trends and extrapolating; these kinds of predictions have been proven wrong, again and again. Instead, Dunne

and Raby pose “what if” questions that are intended to open debate and discussion about the kind of future people want (and do not want). Speculative Everything offers a tour through an emerging cultural landscape of design ideas, ideals, and approaches. Dunne and Raby cite examples from their own design and teaching and from other projects from fine art, design, architecture, cinema, and photography. They also draw on futurology, political theory, the philosophy of technology, and literary fiction. They show us, for example, ideas for a solar kitchen restaurant; a flypaper robotic clock; a menstruation machine; a cloud-seeding truck; a phantom-limb sensation recorder; and devices for food foraging that use the tools of synthetic biology. Dunne and Raby contend that if we speculate more—about everything—reality will become more malleable. The ideas freed by speculative design increase the odds of achieving desirable futures.

parallel journeys pdf: The Day of the Triffids John Wyndham, 2022-04-19 The influential masterpiece of one of the twentieth century's most brilliant—and neglected—science fiction and horror writers, whom Stephen King called “the best writer of science fiction that England has ever produced.” “[Wyndham] avoids easy allegories and instead questions the relative values of the civilisation that has been lost, the literally blind terror of humanity in the face of dominant nature. . . . Frightening and powerful, Wyndham's vision remains an important allegory and a gripping story.”—The Guardian What if a meteor shower left most of the world blind—and humanity at the mercy of mysterious carnivorous plants? Bill Masen undergoes eye surgery and awakes the next morning in his hospital bed to find civilization collapsing. Wandering the city, he quickly realizes that surviving in this strange new world requires evading strangers and the seven-foot-tall plants known as triffids—plants that can walk and can kill a man with one quick lash of their poisonous stingers.

parallel journeys pdf: Island Story J. D. Taylor, 2016-07-12 What is life like in England? Island Story weaves history and ideas telling a story of rebellion (think Brexit) and retail parks, migration and inertia, pessimism and disappearing ways of life, and a fiery, unrealized desire for collective belonging and power. Skeptical and inquisitive, Taylor cycled all round Britain with only a rusty bike and a tent, interviewing and staying with strangers from all walks of life. Without a map and travelling with the most basic of gear, the journey revels in serendipity and schadenfreude. Think you know the island? Island Story will have you think again.

parallel journeys pdf: *Entangled Entertainers* Klaus Hödl, 2019-09-01 Viennese popular culture at the turn of the twentieth century was the product of the city's Jewish and non-Jewish residents alike. While these two communities interacted in a variety of ways to their mutual benefit, Jewish culture was also inevitably shaped by the city's persistent bouts of antisemitism. This fascinating study explores how Jewish artists, performers, and impresarios reacted to prejudice, showing how they articulated identity through performative engagement rather than anchoring it in origin and descent. In this way, they attempted to transcend a racialized identity even as they indelibly inscribed their Jewish existence into the cultural history of the era.

parallel journeys pdf: *The Spell of the Sensuous* David Abram, 2012-10-17 Winner of the International Lannan Literary Award for Nonfiction Animal tracks, word magic, the speech of stones, the power of letters, and the taste of the wind all figure prominently in this intellectual tour de force that returns us to our senses and to the sensuous terrain that sustains us. This major work of ecological philosophy startles the senses out of habitual ways of perception. For a thousand generations, human beings viewed themselves as part of the wider community of nature, and they carried on active relationships not only with other people with other animals, plants, and natural objects (including mountains, rivers, winds, and weather patterns) that we have only lately come to think of as inanimate. How, then, did humans come to sever their ancient reciprocity with the natural world? What will it take for us to recover a sustaining relation with the breathing earth? In *The Spell of the Sensuous* David Abram draws on sources as diverse as the philosophy of Merleau-Ponty, Balinese shamanism, Apache storytelling, and his own experience as an accomplished sleight-of-hand of magician to reveal the subtle dependence of human cognition on the natural environment. He explores the character of perception and excavates the sensual foundations of language, which--even at its most abstract--echoes the calls and cries of the earth. On every page of this lyrical work, Abram weaves his arguments with a passion, a precision, and an intellectual daring that recall such writers as Loren Eiseley, Annie Dillard, and Barry Lopez.

parallel journeys pdf: *Time on Rock* Anna Fleming, 2022-01-06 SHORTLISTED FOR THE WAINWRIGHT PRIZE AND THE BOARDMAN TASKER AWARD FOR MOUNTAIN LITERATURE With great lyricism, Anna Fleming charts two parallel journeys: learning the craft of traditional rock climbing and the developing appreciation of the natural world it brings her. Anna takes us from the gritstone rocks of the Peak District and Yorkshire to the gabbro pinnacles of the Cuillin, the slate of North Wales and the high plateau of the Cairngorms. Each landscape, and each type of rock, brings its own challenges and invites us into the history of a place.

parallel journeys pdf: *The Journey* Frenci Sanna, 2016-09-13 . . . a wonderful teaching tool for those who are welcoming refugees into their community.—The New York Times With haunting echoes of the current refugee crisis this beautifully illustrated book explores the unimaginable decisions made as a family leave their home and everything they know to escape the turmoil and tragedy brought by war. This book will stay with you long after the last page is turned. From the author: *The Journey* is actually a story about many journeys, and it began with the story of two girls I met in a refugee center in Italy. After meeting them I realized that behind their journey lay

something very powerful. So I began collecting more stories of migration and interviewing many people from many different countries. A few months later, in September 2014, when I started studying a Master of Arts in Illustration at the Academy of Lucerne, I knew I wanted to create a book about these true stories. Almost every day on the news we hear the terms migrants and refugees but we rarely ever speak to or hear the personal journeys that they have had to take. This book is a collage of all those personal stories and the incredible strength of the people within them.
