praxis 5038 study guide pdf: Immigrant Student Achievement and Education Policy Louis Volante, Don Klinger, Ozge Bilgili, 2018-03-21 This book examines immigrant student achievement and education policy across a range of Western nations. It is divided into 3 sections: Part 1 introduces the topic of immigrant student achievement and the performance disadvantage that is consistently reported across a range of international jurisdictions. Part 2 then presents national profiles from scholars in ten countries (England, Germany, Italy, Sweden, Finland, Netherlands, Republic of Ireland, Canada, Australia, and New Zealand). These educational jurisdictions were selected because they represent a range of Western nations engaged in large-scale reform efforts geared towards enhancing their immigrant students' achievement. Each of the national profiles provides a brief overview of the evolution of the cultural composition of their respective school-aged student population; explains the trajectory of achievement results in non-immigrant and immigrant student groups in relation to both national and international large-scale assessment measures; and discusses the effectiveness of policy responses that have been adopted to close the achievement gap between non-immigrant and immigrant student populations. It also examines the relationships between education policies and immigrant student achievement and discusses how education policies have evolved across various cultural contexts. In conclusion, Part 3 analyzes cross-cultural approaches designed to address the performance disadvantage of immigrant

students and proposes future areas of inquiry stemming from the national profiles. The book offers insights into a diverse cross-section of nations and policy approaches to addressing the performance disadvantage.

praxis 5038 study guide pdf: *Soviet and Russian Lunar Exploration* Brian Harvey, 2007-08-17 This book tells the story of the Soviet and Russian lunar programme, from its origins to the present-day federal Russian space programme. Brian Harvey describes the techniques devised by the USSR for lunar landing, from the LK lunar module to the LOK lunar orbiter and versions tested in Earth's orbit. He asks whether these systems would have worked and examines how well they were tested. He concludes that political mismanagement rather than technology prevented the Soviet Union from landing cosmonauts on the moon. The book is well timed for the return to the moon by the United States and the first missions there by China and India.

Kathleen Jasper,

praxis 5038 study guide pdf: Wages Against Artwork Leigh Claire La Berge, 2019-08-23 The last twenty years have seen a rise in the production, circulation, and criticism of new forms of socially engaged art aimed at achieving social justice and economic equality. In *Wages Against Artwork* Leigh Claire La Berge shows how socially engaged art responds to and critiques what she calls decommodified labor—the slow diminishment of wages alongside an increase in the demands of work. Outlining the ways in which socially engaged artists relate to work, labor, and wages, La Berge examines how artists and organizers create institutions to address their own and others' financial precarity; why the increasing role of animals and children in contemporary art points to the turn away from paid labor; and how the expansion of MFA programs and student debt helps create the conditions for decommodified labor. In showing how socially engaged art operates within and against the need to be paid for work, La Berge offers a new theorization of the relationship between art and contemporary capitalism.
