prima mebel: Geographical Indication and Global Agri-Food Alessandro Bonanno, Kae Sekine, Hart N. Feuer, 2019-06-25 This book addresses the relevance of geographical indication (GI) as a tool for local and socio-economic development and democratization of agri-food, with case studies from Asia, Europe and the Americas. A geographical indication is a sign used on products that have a specific geographical origin and possess qualities or a reputation that are due to that origin. It provides not only a way for businesses to leverage the value of their geographically unique products, but also to inform and attract consumers. A highly contested topic, GI is praised as a tool for the revitalization of agricultural communities, while also criticized for being an instrument exploited by global corporate forces to promote their interests. There are concerns that the promotion of GI may hamper the establishment of democratic forms of development. The contributing authors address this topic by offering theoretically informed investigations of GI from around the world. The book includes case studies ranging from green tea in Japan, olive oil in Turkey and dried fish in Norway, to French wine and Mexican Mezcal. It also places GI in the broader context of the evolution and trends of agri-food under neoliberal globalization. The book will be of interest to researchers, policy makers and students in agri-food studies, sociology of food and agriculture, geography, agricultural and rural economics, environmental and intellectual property law, and social development.

"The most beautiful, elegant writing I've read in a long time. If you love Anne Tyler, you will ADORE this" Joanna Cannon 'A thoughtful and reflective novel about parents, siblings and the complex – and often challenging – ties that bind them' Hannah Beckerman, Observer 'I absolutely loved its quiet, insightful generosity' Claire King
When Liv, Ellen and Håkon, along with their partners and children, arrive in Rome to celebrate their father's seventieth birthday, a quiet earthquake occurs: their parents have decided to divorce. Shocked and disbelieving, the siblings try to come to terms with their parents' decision as it echoes through the homes they have built for themselves, and forces them to reconstruct the shared narrative of their childhood and family history. A bittersweet novel of regret, relationships and rare insights, *A Modern Family* encourages us to look at the people closest to us a little more carefully, and ultimately reveals that it's never too late for change...

"The author has been dubbed the Norwegian Anne Tyler and for good reason. Three generations of a family head on a holiday to Italy to celebrate patriarch Sverre's 70th birthday – but he and his wife have life-changing news to share. If you love books about dysfunctional families, you'll love this" Good Housekeeping 'As they rebuild their childhood memories, it's telling that their perceptions of themselves and their family relationships are so dramatically different. In quiet prose, Helga Flatland writes with elegance and subtle humour to produce a shrewd and insightful examination of the psychology of family and of loss' Daily Express 'I love the sophistication, directness and tenderness of this book' Claire Dyer 'So perceptive and clever' Rónán Hession 'This is a super exploration of families that I'd urge you to read for the subtle prose, with well defined characters and a strong storyline' Sheila O'Reilly 'It is the most satisfying book that I've read in a long time, and the most clear-eyed, honest, yet sympathetic examination of relationships that I have ever read. The subtlety with which she portrays the inconsistencies between how the characters see each other versus how they see themselves is masterful' Sara Taylor 'Reading Helga Flatland's *A Modern Family* is like watching the sun rise on a cloudy horizon; light whispers and dances and breaks over the clouds.
