popeyes employee handbook: Dare to Serve Cheryl Bachelder, 2015-03-16 "A new perspective on servant leadership—challenging us to bring both courage and humility to the table—for the sake of the people and the enterprise." —John C. Maxwell, New York Times-bestselling author In this updated edition of Dare to Serve, former Popeyes CEO Cheryl Bachelder shows that leading by serving is a rigorous and tough-minded approach that yields the best results. When she was named CEO of Popeyes in 2007, the stock price had slipped from \$34 in 2002 to \$13. The brand was stagnant, the team was discouraged, and the franchisees were just plain angry. Nine years later, restaurant sales were up 45 percent, restaurant profits had doubled, and the stock price was over \$61. Servant leadership is sometimes derided as soft or ineffective, but this book confirms that challenging people to reach a daring destination, while treating them with dignity, creates the conditions for superior performance. The second edition of this bestselling book includes Bachelder's post-Popeyes observations and new examples of how you can switch your leadership from self to serve. Ever engaging and inspirational, Bachelder takes you firsthand through the transformation of Popeyes and shows how anyone, at any level can become a Dare-to-Serve leader. "Extraordinary! Dare to Serve describes the kind of leadership so desperately needed in the 21st century. A powerful blend of courage and humility, Cheryl Bachelder's engaging story offers a clear path for leaders to follow, and what makes her message so compelling is the tremendous results she's produced. I highly recommend this book." —Stephen M. R. Covey, New York Times-bestselling author of The Speed of Trust

popeyes employee handbook: The Capitalism Papers Jerry Mander, 2012-06-08 In the vein of his bestseller, *Four Arguments for the Elimination of Television*, nationally recognized social critic Jerry Mander researches, discusses, and exposes the momentous and unsolvable environmental and social problem of capitalism. Mander argues that capitalism is no longer a viable system: What may have worked in 1900 is calamitous in 2010. Capitalism, utterly dependent on never-ending economic growth, is an impossible absurdity on a finite planet with limited resources. Climate change, together with global food, water, and resource shortages, are only the start. Mander draws attention to capitalism's obsessive need to dominate and undermine democracy, as well as to diminish social and economic equity. Designed to operate free of morality, the system promotes permanent war as a key economic strategy. Worst of all, the problems of capitalism are intrinsic to the form. Many organizations are already anticipating the breakdown of the system and are working to define new hierarchies of democratic values that respect the carrying capacities of the planet.

popeyes employee handbook: Encyclopedia of Junk Food and Fast Food Andrew F. Smith, 2006-08-30 Eating junk food and fast food is a great all-American passion. American kids and grownups love their candy bars, Big Macs and supersized fries, Doritos, Twinkies, and Good Humor ice cream bars. The disastrous health effects from the enormous appetite for these processed fat- and sugar-loaded foods are well publicized now. This was particularly dramatically evidenced by Super Size Me (2004), filmmaker Morgan Spurlock's 30-day all-McDonald's diet in which his liver suffered the same poisoning as if he had been on an extended alcohol binge. Through increased globalization, American popular food culture is being increasingly emulated elsewhere in the world, such as China, with the potential for similar disastrous consequences. This A-to-Z reference is the first to focus on the junk food and fast food phenomena from a multitude of angles in addition to health and diet concerns. More than 250 essay entries objectively explore the scope of the topics to illuminate the American way through products, corporations and entrepreneurs, social history, popular culture, organizations, issues, politics, commercialism and consumerism, and much more. Interest in these topics is high. This informative and fascinating work, with entries on current controversies such as mad cow disease and factory farming, the food pyramid, movie tie-ins, and marketing to children, will be highly useful for reports, research, and browsing. It takes readers behind the scenes, examining the significance of such things as uniforms, training, packaging, and franchising. Readers of every age will also enjoy the nostalgia factor, learning about the background of iconic drive-ins, the story behind the mascots, facts about their favorite candy bar, and collectables. Each entry ends with suggested reading. Besides an introduction, a timeline, glossary, bibliography, resource guide, and photos enhance the text. Sample entries: A&W Root Beer; Advertising; Automobiles; Ben & Jerry's; Burger King; Carhops; Center for Science in the Public Interest; Christmas; Cola Wars; Employment; Fair Food; Fast Food Nation; Hershey, Milton; Hollywood; Injury; Krispy Kreme; Lobbying; Nabisco; Obesity; PepsiCo; Salt; Soda Fountain; Teen Hangouts; Vegetarianism; White Castle; Yum! Brands, Inc.

popeyes employee handbook: Extraordinary Influence Dr. Tim Irwin, 2018-03-12 The age-old question for every leader—how do we bring out the best in those we lead? Anyone who has run a company, raised a family, lead an army, or coached a team struggles to find the key to help others excel and realize their potential. It is surprising how often we resort to criticism vs. an approach that actually results in a better worker and a better person. What if we could speak Words of Life that transform those under our influence and ignite fires of intrinsic motivation? What if those we lead found great purpose in what they do and worked at their jobs with all their heart? Isn't that what leaders, parents and teachers really want? Ultimately, don't we hope to foster intrinsic motivation so that the individuals we lead become better employees, better students or better athletes? Recent discoveries of brain science and the wisdom of top CEO's that Dr. Tim Irwin interviewed for this book give us the answers we've long sought. In most organizations, the methods used to provide feedback to employees such as performance appraisal or multi-rater feedback systems, in fact, accomplish the exact opposite of what we intend. We inadvertently speak Words of Death. Brain science tells us that these methods tend to engage a natural "negativity bias" that is hardwired in us all. Science in recent years discovered that affirmation sets in motion huge positive changes in the brain. It releases certain neuro chemicals associated with well-being and higher performance. Amazingly, criticism creates just the opposite neural reaction. The most primitive part of the brain goes into hyper defense mode, compromising our performance, torpedoing our motivation and limiting access to our higher-order strengths. How do we redirect employees who are out-of-line without engaging our natural "negativity bias?" Leaders must forever ban the term, "Constructive Criticism." Brain science tells us that we can establish a connection between the employee's work and his or her aspirations. This book calls for a new approach to align workers with an organization's mission, strategy and goals, called Alliance Feedback.

popeyes employee handbook: Boards That Lead Ram, Dennis, 2013-11-19 Is your firm's board creating value—or destroying it? Change is coming. Leadership at the top is being redefined

as boards take a more active role in decisions that once belonged solely to the CEO. But for all the advantages of increased board engagement, it can create debilitating questions of authority and dangerous meddling in day-to-day operations. Directors need a new road map—for when to lead, when to partner, and when to stay out of the way. Boardroom veterans Ram Charan, Dennis Carey, and Michael Useem advocate this new governance model—a sharp departure from what has been demanded by governance activists, raters, and regulators—and reveal the emerging practices that are defining shared leadership of directors and executives. Based on personal interviews and the authors' broad and deep experience working with executives and directors from dozens of the world's largest firms, including Apple, Boeing, Ford, Infosys, and Lenovo, *Boards That Lead* tells the inside story behind the successes and pitfalls of this new leadership model and explains how to:

- Define the central idea of the company
- Ensure that the right CEO is in place and potential successors are identified
- Recruit directors who add value
- Root out board dysfunction
- Select a board leader who deftly bridges the divide between management and the board
- Set a high bar on ethics and risk

With a total of eighteen checklists that will transform board directors from monitors to leaders, Charan, Carey, and Useem provide a smart and practical guide for businesspeople everywhere—whether they occupy the boardroom or the C-suite.

popeyes employee handbook: High Performance Boards Didier Cossin, 2020-06-22 A comprehensive guide to transforming boards and achieving best-practice governance in any organisation. When practising good governance, the board is the vital driver of organizational success, while fostering positive social impact and economic value creation. At all levels, executives around the world are faced with complexities rising from disruptive business models, new technologies, socio-economic changes, shifting political circumstances, and an array of other sources. *High Performance Boards* is the comprehensive manual for attaining best-in-class governance, offering pragmatic guidance on improving board quality, accountability, and performance. This authoritative volume identifies the four dimensions, or pillars, which are crucial for establishing and maintaining best-practice boards: the people involved, the information architecture, the structures and processes, and the group dynamics and culture of governance. This methodology can be applied to any board in the world, corporate or non-profit organization, regardless of size, sector, industry, or context. Readers are introduced to a fictitious senior board member – an amalgamation of board members from well-known organisations – and follow her as she successfully handles real-life challenges with effective governance. popeyes employee handbook: The Global Rule of Three Jagdish Sheth, Can Uslay, Raj Sisodia, 2020-12-10 In our increasingly digital, mobile, and global world, the existing theories of business and economics have lost much of their appeal with the phenomenal rise of Chindia, the reality of Brexit, the turmoil caused by the Covid-19 pandemic, and the seismic shifting of the global center of gravity from west to east. In the area of innovation, the traditional thinking that a developed country, often the US, will come up with the next major innovation, launch at home first, and then take it to other markets does not ring true anymore. Similarly, the world where conglomerates go bargain-hunting for acquisitions in emerging markets has been turned upside-down. This book reveals and illustrates the Global Rule of Three phenomenon, which stipulates that in competitive markets only three companies (which the authors call generalists) can dominate the market. All other players in the market are specialists. Further, whereas the financial performance of generalists improves as market share increases, specialist companies see a decrease in financial performance as their market share increases, as the latter are margin-driven companies. This theory powerfully captures the evolution of global markets and what executives must do to succeed. It is based on empirical analyses of hundreds of markets and industries in the US and globally. Competitive markets evolve in a predictable fashion across industries and geographies, where every industry goes through a similar lifecycle from beginning to end (or revitalization). From local to regional to national markets, the last stop in the evolution of markets is going global. The pattern is so consistent that it represents a distinct and natural market structure at every level. The authors offer strategies that generalists and specialist should follow to stay competitive as well as twelve expansion strategies for global companies from emerging markets. This book chronicles this global evolution and provides impactful managerial implications for executives and students of marketing and corporate strategy alike.

popeyes employee handbook: Rumor Psychology Nicholas DiFonzo, Prashant Bordia, 2007 In Rumor Psychology: Social and Organizational Approaches, expert rumor researchers Nicholas DiFonzo and Prashant Bordia investigate how rumors start and spread, the accuracy of different types of rumor, and how rumors can be controlled, particularly given their propagation across media outlets and within organizations. Rumors are an enduring feature of our social and organizational landscapes. They attract attention, evoke emotion, incite involvement, affect attitudes and actions - and they are ubiquitous. Rumor transmission is motivated by three broad psychological motivations - fact-finding, relationship-enhancement, and self-enhancement - all of which help individuals and groups make sense in the face of uncertainty. Rumor is closely entwined with a host of social and organizational phenomena, including social cognition, attitude formation and maintenance, prejudice and stereotyping, group dynamics, interpersonal and intergroup relations, social influence, and organizational trust and communication. Organizational rumors, in contrast with natural disaster rumors, tend to be highly accurate, with accuracy being affected by cognitive, motivational, situational, group, and network factors. DiFonzo and Bordia describe how managers can most effectively manage and refute rumors and infer that employee trust in management inhibits rumor activity.

popeyes employee handbook: The Leadership Gap Lolly Daskal, 2017-05-30 Do people see you as the kind of leader you want to be? Are your strongest leadership qualities getting in the way of your greatness? After decades of advising and inspiring some of the most eminent chief executives in the world, Lolly Daskal has uncovered a startling pattern: within each leader are powerful abilities that are also hidden impediments to greatness. She's witnessed many highly driven, overachieving leaders rise to prominence fueled by well-honed skill sets, only to falter when the shadow sides of the same skills emerge. Now Daskal reveals her proven system, which leaders at any level can apply to dramatically improve their results. It begins with identifying your distinctive leadership archetype and recognizing its shadow: ■ The Rebel, driven by confidence, becomes the Imposter, plagued by self-doubt. ■ The Explorer, fueled by intuition, becomes the Exploiter, master of manipulation. ■ The Truth Teller, who embraces candor, becomes the Deceiver, who creates suspicion. ■ The Hero, embodying courage, becomes the Bystander, an outright coward. ■ The Inventor, brimming with integrity, becomes the Destroyer, who is morally corrupt. ■ The Navigator, trusts and is trusted, becomes the Fixer, endlessly arrogant. ■ The Knight, for whom loyalty is everything, becomes the Mercenary, who is perpetually self-serving. Using psychology, philosophy, and her own experience,

Daskal offers a breakthrough perspective on leadership. She'll take you inside some of the most cloistered boardrooms, let you in on deeply personal conversations with industry leaders, and introduce you to luminaries who've changed the world. Her insights will help you rethink everything you know to become the leader you truly want to be.
