Understanding the Redken Color Chart PDF

The Redken color chart PDF is a detailed visual guide that displays the complete range of hair color shades available within the Redken product line. This chart is designed to assist professionals in identifying the exact color formulations and tones offered by Redken, which include natural shades, fashion colors, and high-lift blondes. The PDF format allows for easy access and reference both in salons and on-the-go, ensuring that stylists have a reliable resource at their fingertips.

The chart is organized by levels of depth, generally ranging from lightest to darkest shades, with corresponding tone descriptions. Each shade is designated by a numerical and alphabetical code, representing the color's depth and tone family. This system simplifies the color selection process, allowing for precise customization according to client needs and hair characteristics.

Components of the Redken Color Chart

The Redken color chart includes several key components that make it an effective tool:

- **Level Numbers:** These indicate the darkness or lightness of the hair color, typically ranging from level 1 (black) to level 10 (lightest blonde).
- **Tone Letters:** Letters such as N (Natural), A (Ash), G (Gold), R (Red), and V (Violet) represent the undertones or shades within each level.
- **Shade Samples:** Swatches or color blocks that visually demonstrate the resulting hair color on pre-lightened hair.
- **Additional Notes:** Some charts include information on formulation suggestions, developer volumes, and color correction tips.

How to Read and Interpret the Redken Color Chart

Properly reading the Redken color chart PDF is crucial for achieving accurate hair color results. Understanding the alphanumeric coding and how it relates to the final hair color can prevent unwanted outcomes and ensure client satisfaction.

Decoding the Level and Tone System

The first step is recognizing the level number, which indicates the base color depth. For example, level 5 is a medium brown, while level 8 is a light blonde. Following the level is the tone letter(s), which define the color's hue or undertone. For instance, 6N is a natural medium brown, while 7A represents an ash blonde with cool undertones.

Using the Chart for Color Correction and Mixing

The Redken color chart PDF is also invaluable when performing color corrections or custom formulations. By referencing the chart, stylists can identify the underlying pigments and select complementary shades to neutralize or enhance tones. For example, if a client's hair has unwanted brassiness, choosing a shade with violet or ash tones can counteract the warmth.

redken color chart pdf: Reality Bites Back Jennifer L. Pozner, 2010-10-19 Nearly every night on every major network, unscripted (but carefully crafted) reality TV shows routinely glorify retrograde stereotypes that most people would assume got left behind 35 years ago. In Reality Bites Back, media critic Jennifer L. Pozner aims a critical, analytical lens at a trend most people dismiss as harmless fluff. She deconstructs reality TV's twisted fairytales to demonstrate that far from being simple guilty pleasures, these programs are actually guilty of fomenting gender-war ideology and significantly affecting the intellectual and political development of this generation's young viewers. She lays out the cultural biases promoted by reality TV about gender, race, class, sexuality, and consumerism, and explores how those biases shape and reflect our cultural perceptions of who we are, what we're valued for, and what we should view as our place in society. Smart and informative, Reality Bites Back arms readers with the tools they need to understand and challenge the stereotypes reality TV reinforces and, ultimately, to demand accountability from the corporations responsible for this contemporary cultural attack on three decades of feminist progress.

redken color chart pdf: Fire in the Mind Pupul Jayakar, Jiddu Krishnamurti, 1995 Published on the birth centenary of J. Krishnamurti, Fire in the Mind is a book of important discussions conducted with Krishnamurti. Held from the end of the 1960s to 28 December 1985, seven weeks before his death on 17 February 1986, these dialogues cover a vast ocean of human concerns—fear, sorrow, death, time, culture, ageing and the renewal of the brain. They also explore subjects that are central to scientific research today, such as the questions of biological survival, the nature of consciousness, artificial intelligence, computers and the mechanical mind. J. Krishnamurti needs no introduction. A sage, a seer, a religious revolutionary and a teacher of profound compassion, Krishnamurti negated all spiritual authority. He sought freedom from the Guru, the book, tradition and the authoritarian voice of another. 'Truth is within you,' he said, and to discover that truth in the luminous light of perception was to transform the very nature of thought and consciousness. It was to awaken intelligence, insight and an abundant compassion. The total responsibility lay with

the individual. No one could free another from bondage. These dialogues reveal Krishnamurti's approach to self-knowing and his way of investigation into the brain, the mind and the consciousness. In a world brought to the edge of the abyss by growing violence, soaring religious fundamentalism, the desecration of nature and a massive assault on human integrity, they provide a new direction to those of us seeking an alternative way of life.

redken color chart pdf: *The Nature of Diamonds* George E. Harlow, American Museum of Natural History, 1998 The paragon of physical perfection and a sparkling example of Earth's forces at work, the diamond has fascinated all realms of society, from Russian tsars and Hollywood stars to scientists and brides-to-be. *The Nature of Diamonds* is an authoritative and richly illustrated look at nature's most coveted gem. Leading geologists, gemologists, physicists, and cultural observers cover every facet of the stone, from its formation in the depths of the Earth and its explosive ascent to the surface, to its economic, regal, social, and technological roles. The book takes the reader to cutting-edge research on the frontiers of diamond exploration and exploitation, from Arctic wastes to laboratories that create industrial diamonds for cutting tools that slice through rock. Charting the history of mining from its origins in India and Brazil, the book follows the diamond rush in South Africa to today's high-tech enterprises. It provides a glimpse into the economics of the diamond trade, and an overview of diamond cutting, from the rough uncut stones in early Indian and Roman jewelry to the multifaceted stones we see today. The cultural history of the diamond as both a revered and a social symbol is explored, from its early history as the exclusive property of royalty to today's brilliant-laden jewelry as an emblem of wealth and status. The engaging text is complemented by more than 200 lavish illustrations which span fine art, earth science, and cultural studies and capture the brilliance and beauty of this extraordinary gem.

redken color chart pdf: Jataka Tales of the Buddha (Volume I) Ken and Visakha Kawasaki, 2018-02-15 Whereas Western intellectuals seek the essence of Buddhism in its doctrines and meditation practices, the traditional Buddhists of Asia absorb the ideas and values of their spiritual heritage through its rich narrative literature about the Buddha and his disciples. The most popular collection of Buddhist stories is, without doubt, the Jatakas. These are the stories of the Buddha's past births, relating his experiences as he passed from life to life on the way to becoming a Buddha. At times he takes the form of a bird, at times he is born as a hare, a monkey, a prince, a merchant, or an ascetic, but in each case he uses the challenges he meets to grow in generosity, virtue, patience, wisdom, and compassion. This anthology of Jatakas, ably told by Ken and Visakha Kawasaki, remains faithful to the original yet presents the stories in clear and simple language. It thereby makes the Jatakas accessible even to young readers and to those for whom English is not their first language.

redken color chart pdf: Red Ocean Traps (Harvard Business Review Classics) W. Chan Kim, Renée A. Mauborgne, 2017-05-30 As established markets become less profitable, companies increasingly need to find ways to create and capture new markets. Despite much investment and commitment, most firms struggle to do this. What, exactly, is getting in their way? World-renowned professors W. Chan Kim and Renee Mauborgne, the authors of the best-selling book Blue Ocean Strategy have spent over a decade exploring that question. They have seen that the trouble lies in managers' mental models--ingrained assumptions and theories about the way the world works. Though these models may work perfectly well in mature markets, they undermine executives' attempts to discover uncontested new spaces with ample potential (blue oceans) and keep companies firmly anchored in existing spaces where competition is bloody (red oceans). In this bound version of their bestselling Harvard Business Review classic article, they describe how to break free of these red ocean traps. To do that, managers need to: (1) Focus on attracting new customers, not pleasing current customers; (2) Worry less about segmentation and more about what different segments have in common; (3) Understand that market creation is not synonymous with either technological innovation or creative destruction; and (3) Stop focusing on premium versus low-cost strategies. The Harvard Business Review Classics series offers you the opportunity to make seminal Harvard Business Review articles a part of your permanent management library. Each highly readable volume contains a groundbreaking idea that continues to shape best practices and inspire countless managers around the world--and will have a direct impact on you today and for years to come.

And it brings to light the secret link between the L'Oreal high command and the President of France himself, Francois Mitterrand - a link cast in the darkness of the Nazi past.
