realidades 2 pdf: *Drawdown* Paul Hawken, 2017-04-18 • New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world “At this point in time, the *Drawdown* book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope.” —Per Espen Stoknes, Author, *What We Think About When We Try Not To Think About Global Warming* “There’s been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom.” —David Roberts, *Vox* “This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook.” —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come

together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth's warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

realidades 2 pdf: The Female Man Joanna Russ, 2018-05-08 Four alternate selves from radically different realities come together in this “dazzling” and “trailblazing work” (The Washington Post). Widely acknowledged as Joanna Russ’s masterpiece, *The Female Man* is the suspenseful, surprising, darkly witty, and boldly subversive chronicle of what happens when Jeannine, Janet, Joanna, and Jael—all living in parallel worlds—meet. Librarian Jeannine is waiting for marriage in a past where the Depression never ended, Janet lives on a utopian Earth with an all-female population, Joanna is a feminist in the 1970s, and Jael is a warrior with claws and teeth on an Earth where male and female societies are at war with each other. When the four women begin traveling to one another’s worlds, their preconceptions on gender and identity are forever challenged. With “palpable anger . . . leavened by wit and humor” (The New York Times), Russ both employs and upends genre conventions to deliver a wickedly satiric and exhilarating version of when worlds collide and women get woke. This ebook includes the Nebula Award-winning bonus short story “When It Changed,” set in the world of *The Female Man*.

realidades 2 pdf: *Tres décadas de la constitución de los derechos: entre promesas y realidades* Julián Tole Martínez, 2023-07-06 Después de treinta años de nuestra Constitución Política, esta obra colectiva presenta una investigación que recoge reflexiones que han marcado el constitucionalismo colombiano, principalmente, los desafíos de las transformaciones de las instituciones, mecanismos de protección y el régimen iusfundamental que materializa las relaciones entre los titulares o los destinatarios y el derecho, dejando a su paso un sinnúmero de avances y promesas incumplidas a lo largo de estas tres décadas de existencia. Sin duda, el paso del tiempo ha permitido que la academia sea crítica y propositiva a partir de una visión retrospectiva que analice los mandatos constitucionales claves como el fortalecimiento del Estado Social de Derecho, el diseño institucional armónico, la construcción de una sociedad inclusiva y deliberativa, y la protección de los grupos y minorías que históricamente han sido vulnerables en gran parte de nuestro territorio. Así, esta oportunidad de

reflexión permite preguntarnos: ¿hasta qué punto el régimen de libertades y derechos fundamentales han sido aplicados?; o ¿qué tanto este régimen ha contribuido a la creación de una sociedad transformada? A partir de estos cuestionamientos, la Universidad Externado de Colombia y la Defensoría del Pueblo realizaron las xxii Jornadas de Derecho Constitucional denominadas 30 años de una promesa de país: luces y sombras de la Constitución de 1991.

realidades 2 pdf: Gender and Identity around the World [2 volumes] Chuck Stewart, 2020-11-09 This book provides an indispensable resource for high school and college students interested in the history and current status of gender identity formation and maintenance and how it impacts LGBTQ rights throughout the world. Gender and Identity around the World explores a variety of gender and LGBTQ experiences and issues in countries from all the world's regions. Guided by more than 50 recognized academic experts, readers will examine how gender and LGBTQ identities are developed, fought for, perceived, and policed in countries as diverse as France, Brazil, Russia, Jordan, Iraq, and China. realidades 2 pdf: Spanish Tourism Geographies Asunción Blanco-Romero, Macià Blázquez-Salom, 2023-09-30 This book provides an overview of the progress in Spanish tourism geography, particularly after the overlay of financial, pandemic and climate crisis, by the scrutiny of the different geographical areas and variables of analysis. It shows the diversity of geographical environments and their varied relationship with tourism, from the emptied inland regions to urban heritage in historic centres to coastal resorts. The book also introduces the analysis of the most important variables when studying the implications of Spanish tourist specialization. How are the beaches with intensive tourist use managed? What socio-spatial processes do leisure-rooted migrations involve? What are the labour conditions in the Spanish tourism industry? How does saving water boost tourism growth? The book offers answers through a methodological specificity of Spanish geography, which is highly oriented towards the analysis of public policies and even the proposal of new planning and methodology formulas that go beyond diagnostic studies. The domestic perspective, or that of insiders, of these scientists residing in Spain bestows them with special codes for conducting interpretations and analyses based on their everyday proximity to a territory characterised by its intense touristification. The tourism and real estate specialisation that Spanish society, together with its territory and institutions, have forged since the beginning of "developmentalism" permeates this scientific analysis. By providing a strong conceptual and

empirical portrait, this book is a great resource for students and scholars in geography of tourism, as well as for social scientists and policy makers.

realidades 2 pdf: Fighting Monsters in the Abyss Harvey F. Kline, 2015-12-15 Studies the complex constraints and trade-offs the second administration of Colombian President Uribe (2006–2010) encountered as it attempted to resolve that nation's violent Marxist insurrection and to have a more efficient judicial system. *Fighting Monsters in the Abyss* offers a deeply insightful analysis of the efforts by the second administration of Colombian President Álvaro Uribe Vélez (2006–2010) to resolve a decades-long Marxist insurgency in one of Latin America's most important nations. Continuing work from his prior books about earlier Colombian presidents and yet written as a stand-alone study, Colombia expert Harvey F. Kline illuminates the surprising successes and setbacks in Uribe's response to this existential threat. In *State Building and Conflict Resolution in Colombia, 1986–1994*, Kline documented and explained the limited successes of Presidents Virgilio Barco and César Gaviria in putting down the revolutionaries while also confronting challenges from drug dealers and paramilitary groups. The following president Andrés Pastrana then boldly changed course and attempted resolution through negotiations, an effort whose failure Kline examines in *Chronicle of a Failure Foretold*. In his third book, *Showing Teeth to the Dragons*, Kline shows how in his first term President Álvaro Uribe Vélez more successfully quelled the insurrection through a combination of negotiated demobilization of paramilitary groups and using US backing to mount more effective military campaigns. Kline opens *Fighting Monsters in the Abyss* with a recap of Colombia's complex political history, the development of Marxist rebels and paramilitary groups and their respective relationships to the narcotics trade, and the attempts of successive Colombian presidents to resolve the crisis. Kline next examines the ability of the Colombian government to reimpose rule in rebel-controlled territories as well as the challenges of administering justice. He recounts the difficulties in the enforcement of the landmark Law of Justice and Peace as well as two significant government scandals, that of the "false positives" ("falsos positivos") in which innocent civilians were killed by the military to inflate the body counts of dead insurgents and a second scandal related to illegal wiretapping. In tracing Uribe's choices, strategies, successes, and failures, Kline also uses the example of Colombia to explore a dimension quite unique in the literature about state building: what happens when some members of a government resort to breaking rules or betraying their societies' values in well-intentioned efforts to build a stronger state?

realidades 2 pdf: State of the World's Cities 2010/11 Un-Habitat, 2010-08-12 The world's urban population now exceeds the world's rural population. What does this mean for the state of our cities, given the strain this global demographic shift is placing upon current urban infrastructures? Following on from previous State of the World's Cities reports, this edition uses the framework of 'The Urban Divide' to analyse the complex social, political, economic and cultural dynamics of urban environments. realidades 2 pdf: Mathematics Teacher Education in the Andean Region and Paraguay Yuriko Yamamoto Baldin, Uldarico Malaspina, 2018-10-04 This Open Access book is an excellent synthesis of the initial and continuing preparation for Mathematics Teaching in Bolivia, Ecuador, Paraguay and Peru, from which comparative analyses can be made that show similarities and differences, and highlight various perspectives. In February 2016, the 5th Capacity and Networking Project (CANP) workshop of the International Commission on Mathematical Instruction (ICMI) was held in Lima, Peru. The coordination of this two-week workshop was undertaken by an international scientific committee (IPC), with equal participation by mathematicians and mathematics educators from the region and from the international ICMI and IMU community. The goal of CANP5 was to improve the quality of mathematics education in the region, which led to the main theme of the scientific program "Initial and Continued Teacher Education". Country Reports on the main theme of teacher education systems for each country in this region were presented and discussed to detect common issues that might be improved through a collaborative network. One of the most important results of this event was the creation of a Mathematics Education Network, namely the Comunidad de Educación Matemática de America del Sur - CEMAS. This book brings to the international Educational Community an important collection of experiences and ideas in the Mathematics Education of four Latin-American countries in the developing Andean region and Paraguay. The dissemination of these results can promote the search for international collaborative actions in a wider scale.

realidades 2 pdf: Changing Sexualities and Parental Functions in the Twenty-First Century Candida Se Holovko, 2018-03-26 Recent societal changes have challenged long-established concepts in psychoanalysis, including the Oedipus complex, parental functions, and male and female psychosexuality. 'Postmodern families', based on sexual and emotional exchanges independent of gender, now include homoerotic couples who adopt children, or who create them through assisted fertilisation, as well as single parent families and blended families. A number of highly-renowned Latin American psychoanalysts have drawn attention to the urgency of revising theoretical and clinical concepts in the light of these new scenarios. In this book, they open up ideas which cover familiar territory of current concerns in psychoanalytic work, as well as other little-explored areas, with the emphasis on evolving sexualities and new experiences of parenthood. The first section revisits psychoanalytic theories, particularly parental functions in the area of sexuality and gender. The following section discusses new family configurations, and vicissitudes of the desire to have a child in men and women, with the authors presenting some psychic consequences for parents in therapy who have turned to assisted fertilisation.

realidades 2 pdf: Maternal Geographies Jennufer L. Johnson, 2019-05-01 This collection broaches the intersections of critical motherhood studies and feminist geography. Contributors demonstrate that an important dimension of the social construction of motherhood is how mothering happens in space and place, leading to the articulation of diverse maternal geographies. Through 16 concise chapters divided into three thematic sections, the contributors provide an account of motherhood and mothering as spatial practices that are embedded in relations of power across time

and place. While some contributors explore how dominant discourses of motherhood seek to keep mothers in their place, others take up the notion of maternal geographies as productive in their own right and follow their subjects as they create a new sense of place. Collectively, the authors demonstrate that mothers are produced and regulated as subjects in relation to space and place, and also that practices of mothering produce spatial relationships.

realidades 2 pdf: Covid-19 and the Sociology of Risk and Uncertainty Patrick R. Brown, Jens O.

Zinn, 2022-05-25 This book provides a global perspective on COVID-19, taking the heterogeneous realities of the pandemic into account. Contributions are rooted in critical social science studies of risk and uncertainty and characterized by theoretical approaches such as cultural theory, risk society theory, governmentality perspectives, and many important insights from 'southern' theories. Some of the chapters in the book have a more theoretical-conceptual emphasis, while others are more empirically oriented – but all chapters engage in an insightful dialogue between the theoretical and the empirical, in order to develop a rich, diverse and textured picture of the new challenge the world is facing and responding to. Addressing multiple levels of responses to the coronavirus, as understood in terms of, institutional and governance policies, media communication and interpretation, and the sense-making and actions of individual citizens in their everyday lives, the book brings together a diverse range of studies from across 6 continents. These chapters are connected by a common emphasis on applying critical theoretical approaches which help make sense of, and critique, the responses of states, organisations and individuals to the social phenomena emerging amid the Corona pandemic.

realidades 2 pdf: Migrant Communication Enterprises Maria Sabaté-Dalmau, 2014-08-06 This unique critical sociolinguistic ethnography explores alternative migrant-regulated institutions of resistance and subversive communication technology: the locutorios or ethnic call shops. These migrant-owned businesses act as a window into their multimodal and hybrid linguistic and communicative practices, and into their own linguistic hierarchies and non-mainstream sociolinguistic orders. Here, socially displaced but technologically empowered transnational migrant populations actively find subversive ways to access information and communication technologies. As such they mobilise their own resources to successfully inhabit Catalonia, at the margins of powerful institutions. The book also focuses on the (internal) social organisation dynamics, as well as on the simultaneous fight against, and re-production of, practices and processes of social difference and social inequality among migrants themselves.
