the julian chapter pdf: The Last Traverse Ty Gagne, 2020-11-11 On a mountain somewhere above treeline, in some of the coldest and worst winter conditions imaginable, two men lie unconscious in the snow as explosive winds batter the nearby summits. In The Last Traverse: Tragedy and Resilience in the Winter Whites, Ty Gagne masterfully lays out the events that led up to an epic and legendary rescue attempt in severe and dangerous winter conditions in the White Mountains of New Hampshire. More than a cautionary tale, it is a tribute to all the volunteers and professionals who willingly put themselves in harm's way to save lives. This is a must read for anyone who hikes the Whites. In his first book, Where You'll Find Me: Risk, Decisions, and the last

Climb of Kate Matrosova, Ty Gagne established his credentials as a writer of well-researched and objective analysis of mountain accidents. Moreover, *Where You'll Find Me* reads like a novel, a book I couldn't put down. In his latest book, *The Last Traverse*, Gagne takes the combination of analysis and storytelling to a new level in a tale of survival and tragedy in the White Mountains. -Mark Synnott, author of *The Impossible Climb: Alex Honnold, El Capitan, and the Climbing Life* and *The Third Pole: Mystery, Obsession, and Death on Mount Everest*

the julian chapter pdf: Cochrane Handbook for Systematic Reviews of Interventions Julian P. T. Higgins, Sally Green, 2008-11-24 Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a standardized format, published in The Cochrane Library (www.thecochranelibrary.com). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform reviews themselves.

the julian chapter pdf: Julian Among the Books Julia Bolton Holloway, 2016-04-26 Julian among the Books: Julian of Norwich's Theological Library brings together innovative research on aspects of the Showing of Love, especially the Pan-European background of its manuscripts, and their contexts, arguing for the concept of 'Holy Conversations' in a *mise en abyme*, where her readers, breaking the frame, participate in her contemplative visions. It discusses the three versions of her text, her knowledge of Hebrew, and her Benedictine context and its *lectio divina*, including textual and physical links with the Norwich monk, Cardinal Adam Easton, OSB, his collegial friendship with St Catherine of Siena and St Catherine of Sweden, and his support for St Birgitta of Sweden's canonisation. The book also explores the library of texts of the 'Friends of God' movement, including the *Mirror of Simple Souls* of Marguerite Porete, presents the texts of Julian's conversation with Margery Kemp, and discusses the exiled Brigittine and Benedictine nuns who continued to treasure and copy Julian's text on the Continent following England's Reformation. Scholarly methods used in this study include palaeography, codicology, iconography, reader reception, discourse on the Body, use of Hebrew, Greek and Latin, and the concepts of 'Holy Conversation' and 'Textual Communities'. It gives much of the text of the Westminster Manuscript in translation, along with many quotations from the Westminster, Paris and Sloane manuscripts in their original layout and spelling. Illustrated with colour plates of the Julian manuscripts in the centrefold and other images, and black and white figures throughout the body of the text, it brings the reader as close as possible to Julian's writing, her context, and her preservation by other women contemplatives throughout time.

the julian chapter pdf: *From Hospitality to Grace* Julian Alfred Pitt-Rivers, 2017 The Pitt-Rivers Omnibus brings together the definitive essays and lectures of the influential social anthropologist Julian A. Pitt-Rivers, a corpus of work that has, until now, remained scattered, untranslated, and unedited. Illuminating the themes and topics that he engaged throughout his life—including hospitality, grace, the symbolic economy of reciprocity, kinship, the paradoxes of friendship, ritual logics, the anthropology of dress, and more—this omnibus brings his reflections to new life. Holding Pitt-Rivers's diversity of subjects and ethnographic foci in the same gaze, this book reveals a theoretical unity that ran through his work and highlights his iconic wit and brilliance. Striking at the heart of anthropological theory, the pieces here explore the relationship between the mental and the material, between what is thought and what is done. Classic, definitive, and yet still extraordinarily relevant for contemporary anthropology, Pitt-Rivers's lifetime contribution will provide a new generation of anthropologists with an invaluable resource for reflection on both ethnographic and theoretical issues.

the julian chapter pdf: Good Economics for Hard Times Abhijit V. Banerjee, Esther Duflo, 2019-11-12 The winners of the Nobel Prize show how economics, when done right, can help us solve the thorniest social and political problems of our day. Figuring out how to deal with today's critical economic problems is perhaps the great challenge of our time. Much greater than space travel or perhaps even the next revolutionary medical breakthrough, what is at stake is the whole idea of the good life as we have known it. Immigration and inequality, globalization and technological disruption, slowing growth and accelerating climate change—these are sources of great anxiety

across the world, from New Delhi and Dakar to Paris and Washington, DC. The resources to address these challenges are there--what we lack are ideas that will help us jump the wall of disagreement and distrust that divides us. If we succeed, history will remember our era with gratitude; if we fail, the potential losses are incalculable. In this revolutionary book, renowned MIT economists Abhijit V. Banerjee and Esther Duflo take on this challenge, building on cutting-edge research in economics explained with lucidity and grace. Original, provocative, and urgent, *Good Economics for Hard Times* makes a persuasive case for an intelligent interventionism and a society built on compassion and respect. It is an extraordinary achievement, one that shines a light to help us appreciate and understand our precariously balanced world.

the julian chapter pdf: [An Introduction to Statistical Learning](#) Gareth James, Daniela Witten, Trevor Hastie, Robert Tibshirani, Jonathan Taylor, 2023-08-01 *An Introduction to Statistical Learning* provides an accessible overview of the field of statistical learning, an essential toolset for making sense of the vast and complex data sets that have emerged in fields ranging from biology to finance, marketing, and astrophysics in the past twenty years. This book presents some of the most important modeling and prediction techniques, along with relevant applications. Topics include linear regression, classification, resampling methods, shrinkage approaches, tree-based methods, support vector machines, clustering, deep learning, survival analysis, multiple testing, and more. Color graphics and real-world examples are used to illustrate the methods presented. This book is targeted at statisticians and non-statisticians alike, who wish to use cutting-edge statistical learning techniques to analyze their data. Four of the authors co-wrote *An Introduction to Statistical Learning, With Applications in R (ISLR)*, which has become a mainstay of undergraduate and graduate classrooms worldwide, as well as an important reference book for data scientists. One of the keys to its success was that each chapter contains a tutorial on implementing the analyses and methods presented in the R scientific computing environment. However, in recent years Python has become a popular language for data science, and there has been increasing demand for a Python-based alternative to ISLR. Hence, this book (ISLP) covers the same materials as ISLR but with labs implemented in Python. These labs will be useful both for Python novices, as well as experienced users.

the julian chapter pdf: *The Image of the City* Kevin Lynch, 1964-06-15 The classic work on the evaluation of city form. What does the city's form actually mean to the people who live there? What can the city planner do to make the city's image more vivid and memorable to the city dweller? To answer these questions, Mr. Lynch, supported by studies of Los Angeles, Boston, and Jersey City, formulates a new criterion—imageability—and shows its potential value as a guide for the building and rebuilding of cities. The wide scope of this study leads to an original and vital method for the evaluation of city form. The architect, the planner, and certainly the city dweller will all want to read this book.

the julian chapter pdf: The Physics of Thermoelectric Energy Conversion Julian Goldsmid, 2017-05-02 This book outlines the principles of thermoelectric generation and refrigeration from the discovery of the Seebeck and Peltier effects in the nineteenth century through the introduction of semiconductor thermoelements in the mid-twentieth century to the more recent development of nanostructured materials. It is shown that the efficiency of a thermoelectric generator and the coefficient of performance of a thermoelectric refrigerator can be related to a quantity known as the figure of merit. The figure of merit depends on the Seebeck coefficient and the ratio of the electrical to thermal conductivity. It is shown that expressions for these parameters can be derived from the band theory of solids. The conditions for favourable electronic properties are discussed. The methods for selecting materials with a low lattice thermal conductivity are outlined and the ways in which the scattering of phonons can be enhanced are described. The application of these principles is demonstrated for specific materials including the bismuth telluride alloys, bismuth antimony, alloys based on lead telluride, silicon-germanium and materials described as phonon-glass electron-crystals. It is shown that there can be advantages in using the less familiar transverse thermoelectric effects and the transverse thermomagnetic effects. Finally, practical aspects of thermoelectric generation and refrigeration are discussed. The book is aimed at readers who do not have a specialised knowledge of solid state physics.
