"Anything the mind can conceive and believe, it can achieve." Within this one line is distilled a success formula so simple that anyone can apply it—and yet so demanding that only a minority of the population ever fully lives it out. Upon it was built a success philosophy that explains how human desires can be translated into material reality, a framework that rests upon the power of thoughts to seek expression in physical form. Through this singular concept, the world's wealthiest and most successful individuals—rich in money, relationships, power, peace of mind, and social standing—have built and maintained their prosperity. It is the foundational principle of Napoleon Hill's Science of Success program, an achievement philosophy that effectively helped end the Great Depression and that has since made more millionaires, cultural icons, and thought leaders than any other. Hill was born in 1883 in a one-room cabin on the Pound River in Wise County, Virginia. He began his writing career at age thirteen as a mountain reporter for small-town newspapers. In 1908, as a young special investigator for a nationally known business magazine, he was sent to interview the great steel magnate Andrew Carnegie. During that interview, Carnegie shared the secrets that had enabled him to acquire hundreds of millions of dollars—a magic law of the human mind, a little-known psychological

principle that was amazing in its power. Believing that this magic formula should be shared with those who did not have the time or resources to discover it on their own, Carnegie tasked Hill with spending twenty years or more developing this principle into a philosophy of personal success. This research would be conducted without pay; Carnegie merely provided Hill with access to over five hundred of America's greatest business leaders in order to test his success formula. In 1937, after twenty-nine years of research and writing, Hill published *Think and Grow Rich*, which contains the thirteen success principles that form the core of the Science of Success. Since its release, it has sold over one hundred million copies worldwide. No literary work in the personal development genre has had a greater creative impact than *Think and Grow Rich*.

**think and grow rich napoleon hill pdf: Andrew Carnegie's Mental Dynamite** Napoleon Hill, Don Green, James Whittaker, 2021-09-07 Based on a series of booklets written by bestselling motivational writer Napoleon Hill, Andrew Carnegie's Mental Dynamite outlines the importance of three essential principles of success: self-discipline, learning from defeat, and the Golden Rule applied. In 1908, Napoleon Hill met industrialist Andrew Carnegie for what he believed would be a short interview for an article. Instead, Carnegie spent hours detailing his principles of success to the young magazine reporter. He then challenged Hill to devote 20 years to collating a proven formula that would propel people of all backgrounds to happiness, harmony, and prosperity. Hill accepted the challenge, which he distilled in the perennial bestseller Think and Grow Rich. Now, more than a century later, the Napoleon Hill Foundation is releasing this epic conversation to remind people that there are simple solutions to the problems troubling us most, everything from relationships and education to homelessness and even democracy. This is revealed in three major principles: self-discipline, which shows how the six departments of the mind may be organized and directed to any end; learning from defeat, which describes how defeat can be made to yield "the seed of an equivalent benefit" and how to turn it into a stepping-stone to greater achievement; and the Golden Rule applied for developing rewarding relationships, peace of mind, and a strengthened consciousness. Each chapter draws on Carnegie's words and advice as inspiration, with annotations by Napoleon Hill scholar James Whittaker explaining why they are essential for reaching your goals and prospering—for you, your family, and your community.

I knew Napoleon Hill in 1922 when I was a student in Salem College in the town of my birth. Mr. Hill came to our campus as the commencement speaker that year. As I listened to him, I heard something other than the words he spoke. I felt the substance—the wisdom—and the spirit of a man and his philosophy. Mr. Hill said the most powerful instrument we have in our hand is the power of the mind.' Napoleon Hill compiled this philosophy of American achievement for the benefit of all people. I strongly commend this philosophy to you for achievement and service in your chosen field. —Senator Jennings Randolph, West Virginia
