In this groundbreaking, insider's look at the women defending our nation, Tanya Biank brings to light the real issues—of femininity, belonging to an old boys' club, veiled discrimination, dating, marriage problems, separation from children, questions about life goals, career trajectories, and self-worth—that servicewomen are facing by focusing on four individual stories. Brigadier General Angela Salinas, the Marine Corps' first Hispanic female general, faces the challenge of commanding an all-male institution. Second Lieutenant Bergan Flanagan finds herself on the frontlines in Afghanistan, serving in the same military police company as her husband. Welcome to the Army Mountain Warfare School (AMWS). During this course, you will receive some of the finest training the US Army has to offer. Our instructors are ready to pass on knowledge gained from years of experience and multiple combat deployments. While you are here, our first concern is for your safety. For this reason, you must be totally focused and maintain situational awareness at all times. 2. Operating in the mountains presents two distinct yet related challenges; first is the severe affects that weather and the environment have on personnel and equipment and second the ever impact the terrain has on unit mobility. How well you solve these tactical problems will directly affect your ability to take the fight to the enemy in level two and three terrain. The skills you learn here at AMWS are tools to help you and your unit solve these challenges. 3. In the mountains of Afghanistan we face an adaptive, clever enemy who uses the harsh environment to his advantage to operate against us. With specialized mountain warfare training and equipment we can use that same terrain

to our advantage and seize the initiative away from the enemy. 4. Untrained and unprepared, the mountain environment can be your worst enemy. Properly trained and equipped, it can be your strongest ally. We will give you the training. The rest is up to you. "Training Mountain Warriors!"

casualty feeder card: Cenotaph Brock Jones, 2016-03-01 Finalist, 2016 Miller Williams Poetry Prize, edited by Billy Collins Out of the contradiction, paradox, loss, and strange beauty of contemporary warfare, Brock Jones brings us *Cenotaph*, a collection of poems that have as their genesis Jones's deployments to Iraq in 2002 and 2005, when he was in the US Army. These are war poems, but also love poems and hate poems, poems about dying and living, poems about hope and hopelessness. These are poems that beautifully reflect Jones's resignation to and rejection of the impossibility of saying anything definitive or honest about war. These are poems that strive to do what poet Bruce Weigl described as the poet's job: to find "some kind of miraculous way that if you work hard enough to get the words right, that which you call horrific and wrong is defeated." *Cenotaph* is a poet doing the poet's work: trying, hoping to get the words right.

casualty feeder card: In the Company of Soldiers Rick Atkinson, 2007-04-01 From Pulitzer Prize winner and bestselling author Rick Atkinson (*Liberation Trilogy*) comes an eyewitness account of the war against Iraq and a vivid portrait of a remarkable group of soldiers. A beautifully written and memorable account of combat from the top down and bottom up as the 101st Airborne commanders and front-line grunts battle their way to Baghdad.... A must-read.—Tom Brokaw For soldiers in the 101st Airborne Division, the road to Baghdad began with a midnight flight out of Fort Campbell, Kentucky, in late February 2003. For Rick Atkinson, who would spend nearly two months covering the division for *The Washington Post*, the war in Iraq provided a unique opportunity to observe today's U.S. Army in combat. Now, in this extraordinary account of his odyssey with the 101st, Atkinson presents an intimate and revealing portrait of the soldiers who fight the expeditionary wars that have become the hallmark of our age. At the center of Atkinson's drama stands the compelling figure of Major General David H. Petraeus, described by one comrade as the most competitive man on the planet. Atkinson spent virtually all day every day at Petraeus's elbow in Iraq, where he had an unobstructed view of the stresses, anxieties, and large joys of commanding 17,000 soldiers in combat. Atkinson watches Petraeus wrestle with innumerable tactical conundrums and direct several intense firefights; he watches him teach, goad, and lead his troops and his subordinate commanders. And all around Petraeus, we see the men and women of a storied division grapple with the challenges of waging war in an unspeakably harsh environment. With the eye of a master storyteller, the premier military historian of his generation puts us right on the battlefield. In *The Company of Soldiers* is a compelling, utterly fresh view of the modern American soldier in action.

casualty feeder card: *U.S. Army Afghan National Army Infantry and Counterinsurgency COIN Manual* , Foreword This manual takes a general approach to COIN. The Army recognizes that every insurgency is contextual and presents its own set of challenges. You cannot fight the Taliban the way you would fight the former Soviet Union; the application of principles and fundamentals to deal with each vary considerably. Nonetheless, all insurgencies, even today's highly adaptable strains, remain wars amongst the people, employ variations of standard themes, and adhere to elements of a recognizable revolutionary campaign plan. This manual therefore addresses the common

characteristics of insurgencies. It strives to provide those carrying out a counterinsurgency campaign a solid foundation on which to build in seeking to understand and address specific insurgencies. A counterinsurgency campaign is, as described in this manual, a mix of offensive, defensive, and stability operations, conducted along multiple lines of operation. It requires Soldiers to employ a mix of both familiar combat tasks and skills more often associated with nonmilitary agencies, with the balance between them varying depending on the local situation. This is not easy. Leaders at all levels must adjust their approach constantly, ensuring that their elements are ready each day to be greeted with a handshake or a hand grenade, to be nation builders as well as warriors, to help reestablish institutions and local security forces, to assist in the rebuilding of infrastructure and basic services, and to facilitate the establishment of local governance and the rule of law. The list of such tasks is a long one and involves extensive coordination and cooperation with a myriad of intergovernmental, indigenous, and international agencies. Indeed, the responsibilities of leaders in a counterinsurgency campaign are daunting – and the discussions in this manual endeavor to alert them to the challenges of such campaigns and to suggest general approaches for grappling with those challenges. Conducting a successful counterinsurgency campaign thus requires a flexible, adaptive force led by agile, well-informed, culturally astute leaders. It is our hope that this manual provides the necessary guidelines to succeed in such a campaign, in operations that inevitably, are exceedingly difficult and complex. Our Soldiers deserve nothing less.
