doc solomon: Cultures of Empire: Rethinking Venetian Rule, 1400-1700 , 2020-07-27 This book investigates perceptions, modes, and techniques of Venetian rule in the early modern Eastern Mediterranean (1400-1700). Against the backdrop of the controversial notion of the Venetian realm as a colonial empire, essays from a range of specialists examine how Venice negotiated control over the territories, resources, and traditions of different empires (Byzantine, Roman, Mamluk, Ottoman) while developing its own claims of authority. Focusing in particular on questions of belonging and status in the Venetian overseas territories, the volume incorporates observations on the daily realities of Venetian rule: how did Venice negotiate claims of authority in light of former and ongoing imperial belongings? What was the status of colonial subjects and ships in the metropolis

and in foreign territories? In what ways did Venice accept and continue old forms of imperial belonging? Did subordinate entities join in a shared communal identity? The volume opens new perspectives on Venetian rule at the crossroads of empire and early modern statehood: a polity negotiating and entangling empire. A mugging goes awry, and a passing jogger—who turns out to be a prominent mayoral candidate—dies. Roy himself is shot twice and hospitalized in critical condition. A local resident catches the whole thing on camera in a video that goes viral. And Roy, by some twist of fate, comes out looking like the hero, losing the hit man's greatest weapon: anonymity. Roy's newfound fame draws unlikely characters into his orbit: Kelly Maguire, a disgraced LAPD detective with an anger management problem; Science, a young gang leader who needs Roy to keep quiet about what he's seen; Mayor Miguel Santiago, who faces accusations that he's just had his opponent whacked; and, most chillingly, Albert Budin, a dangerous man from Roy's past who's just learned that his old acquaintance is still alive.

doc solomon: *Human Rights* Judith Blau, Alberto Moncada, 2005-02-25 There is growing recognition around the globe that people's fundamental human rights are being imperiled in a world economy that is being driven by multinationals, investors, and banks. The 'race to the bottom' and

insatiable greed has intensified poverty and economic inequalities, fueled migration, and rapidly accelerated environmental degradation. The fates of all nations are interdependent and even though the U.S. is the prime driver of the new economy, Americans have likewise experienced declines over the past decades. Blau and Moncada outline the fundamental human rights that all people are entitled to and the important role that nations have in upholding these rights. Americans find it somewhat difficult to accept the basic premise of human rights because liberalism, as a social, political, and economic ethos powerfully undercuts the premise of human rights. American liberalism highlights the efficacy of individual achievement and individual autonomy, thereby promoting the idea that people have no rights to security. Human rights, in contrast to the liberal ethos, asserts that all humans have inalienable rights, including rights to a job, housing, social security, education, and a cultural, racial or ethnic identity. Under the conditions of a turbulent global economy, human rights need to be granted the highest standing. The authors consider global capitalism, as well as the role of the global media, and the problematic relationship between the state and society in America. In the final chapter, we review the many currents of transformative movements that are promoting a more equitable, fairer, and more egalitarian world.

doc solomon: *Kew Gardens* Carl Ballenas with the Aquinas Honor Society of the Immaculate Conception School, 2014 Kew Gardens, Queens, evolved with the dawn of the 20th century. The lush, hilly terrain--the backbone of Long Island--is situated north of the Victorian village of Richmond Hill. In 1910, Alrick Hubble Man noted the 1909 completion of the Queensborough Bridge and envisioned a modern sister community to Richmond Hill in this northern terrain. He developed Kew Gardens, offering people the ability to have homes in an area of breathtaking country beauty while continuing to work in the city. The century-old Kew Gardens Civic Association, formed in 1914, remains a vibrant, active organization. Its members were a large force behind the advancements in Kew Gardens; in 1915, they fought for underground wiring to prevent the installation of unsightly electric poles, and they continue to serve the community today.
