Bengtson, 2013-10-04 Winner of the Distinguished Book Award from American Sociology Association Sociology of Religion Section Winner of the Richard Kalish Best Publication Award from the Gerontological Society of America Few things are more likely to cause heartache to devout parents than seeing their child leave the faith. And it seems, from media portrayals, that this is happening more and more frequently. But is religious change between generations common? How does religion get passed down from one generation to the next? How do some families succeed in passing on their faith while others do not? Families and Faith: How Religion is Passed Down across Generations seeks to answer these

questions and many more. For almost four decades, Vern Bengtson and his colleagues have been conducting the largest-ever study of religion and family across generations. Through war and social upheaval, depression and technological revolution, they have followed more than 350 families composed of more than 3,500 individuals whose lives span more than a century--the oldest was born in 1881, the youngest in 1988--to find out how religion is, or is not, passed down from one generation to the next. What they found may come as a surprise: despite enormous changes in American society, a child is actually more likely to remain within the fold than leave it, and even the nonreligious are more likely to follow their parents' example than to rebel. And while outside forces do play a role, the crucial factor in whether a child keeps the faith is the presence of a strong fatherly bond. Mixing unprecedented data with gripping interviews and sharp analysis, *Families and Faith* offers a fascinating exploration of what allows a family to pass on its most deeply-held tradition--its faith.

We have all encountered inspirational leaders who’ve helped us, taught us, encouraged us, pushed us to get outside our comfort zones, or motivated us to become the best version of ourselves. What is it about their leadership styles that inspires us to do more for our team and our personal and professional growth? Turns out, we admire these leaders for the same reasons we love our favorite hotels, resorts, restaurants, or bars: How they make us feel is essential. Members of today’s workforce—especially millennials and Gen Z—are looking for inspiring environments and work that truly fulfills them. Before anyone is compelled to do anything they first must feel. Speaker, consultant, and hospitality industry veteran Taylor Scott knows that the most effective leaders approach their roles with heart, emotionally connecting with their team members before attempting to manage them. Scott draws from his two decades in leadership roles at respected hotels, resorts, and restaurants. He distills the principles of gracious hospitality, translating them into actionable leadership lessons which apply in any industry, such as: • How making people feel welcome fosters loyalty and keeps workers engaged with an organization’s purpose • How serving people with empathy and compassion sparks workers’ highest productivity • How making people feel comfortable encourages exploration, curiosity, and discovery while inviting everyone to lean into their creativity • How making people feel significant drives them to deliver their best work He also shares specific, practical steps you can take to put these principles into action. Scott shows how to connect, serve, engage, coach, and inspire your peers, teams, and even your own leaders. Lead with Hospitality is a call to action to connect with people on a human level which ultimately inspires teams, organizations, and companies to go to the next level.

MacDonald, 2021-05-25 An inspirational, motivational book that chronicles Michael MacDonald's transformation from a scholarship player at Rutgers' high-level Division I basketball program to a highly successful executive at Xerox and then chairman and CEO of Medifast. "From the Bench to the Boardroom, Michael MacDonald shares his journey from his college basketball career at Rutgers to executive positions at Xerox and Medifast. His leadership, work ethic, and persistence, which were on display every step of the way, have made him a valued member of our board at the Jimmy V Foundation." —Mike Krzyzewski, Naismith Hall of Fame coach, Duke University "Mike holds a deep reverence and appreciation for his time at Rutgers, as well as for the opportunities that Rutgers has provided him. As a letterwinner on the Rutgers men's basketball teams in the 1970s, Mike took his student-athlete experience and translated these learned lessons to successes in his career.... His time as a Rutgers student-athlete, alumnus, board member, donor, and father/father-in-law of three Rutgers alumni continues to leave an indelible legacy on our alma mater. I am proud to call him not only a great teammate, but an even better friend." —Marco Battaglia, Rutgers Football All-American and Cincinnati Bengals Player "I believe the combination of an excellent education and participation in highly competitive sports programs provides invaluable preparation for life after school is over. The best sources of knowledge about the benefits of such a background are people who have been there. Mike MacDonald fits the bill. And he is particularly well suited to write about his experiences because of an amazing ability to recollect the details of his formative years. A student athlete at Rutgers, he was part of the school's then outstanding basketball team. He went on to use this and similar pre-college experiences to build an exceptional business career. That's part of his story but

those of us who know him well would add that he is the epitome of a 'good man.' I have seen him close up with family, friends, and others for years. He is a great husband, dad, and grandfather, kind and generous, enthusiastic, and always on the go. You will enjoy what he has to say." —Gene Renna, Retired Senior Executive, Exxon Mobil "Mike MacDonald represents the absolute best of Rutgers University and is an inspiration to everyone on campus. From the day I met Mike, he has always made himself available to mentor, guide, and motivate both our student-athletes and our coaching staff. As an alumnus, he has given back generously and led the charge in ensuring that Rutgers continues to be a beacon of higher education. I've always admired his ability to juggle the roles of family man, businessman, and leader in the Rutgers community. His path from Rutgers is a shining example for student-athletes of the future. He has succeeded in every aspect of life and continues to give back to the community that molded him. To give Mike MacDonald the ultimate compliment a coach can give, simply put, he is a winner." —Steve Pikiell, Head Men's Basketball Coach, Rutgers University

da 5960 army fillable: Care After Covid: What the Pandemic Revealed Is Broken in Healthcare and How to Reinvent It Shantanu Nundy, 2021-05-04 A practical action plan for reinventing healthcare in a post-pandemic world—from a physician-entrepreneur who works with Fortune 500 companies. If the healthcare system were an emperor, Covid-19 tragically revealed that it had no clothes. Healthcare had to adapt, and quickly—sparking a dramatic acceleration of virtual care, drive-through testing, and home-based services. In the process, old rules were rewritten and, perhaps surprisingly, largely in a good way for patients. To succeed in the post-pandemic world, all of us—patients, caregivers, providers, employers, investors, technologists, and policymakers—need to understand the new healthcare landscape and change our strategies and behaviors accordingly. In *Care After Covid*, practicing physician and business leader Dr. Shantanu Nundy—Chief Medical Officer of Accolade, which provides technology-enabled health services to Fortune 500 companies as well as small businesses—lays out a comprehensive plan to transform healthcare along three dimensions: Distributed: healthcare will happen where health happens. It will shift from where doctors are to where patients are—at home, in the community, and increasingly on their phones. Digitally enabled: healthcare and the relationships that are central to care will be strengthened by data and technology. It will shift from being siloed to connected, from being episodic to continuous, from one-size-fits-all to more personalized. Decentralized: healthcare decisions and resources will be in the hands of those closest to care. The power to determine who gets care and how they get it will shift away from governments and insurance companies to communities, employers, doctors, and patients. Filled with firsthand insights and stories from the frontlines of healthcare—as well as innovative solutions that were proven effective before and during the pandemic—*Care After Covid* shows all stakeholders in the healthcare ecosystem exactly what needs to change and, more importantly, how to do it. The time to act is now. We can't afford not to.

da 5960 army fillable: *Mastering Voice Interfaces* Ann Thymé-Gobbel, 2021 We live in a

golden age of voice technology. Advances in automatic speech recognition (ASR), natural language processing (NLP) and other technologies have made it extremely viable for people to be talking to machines and getting reasonable answers. Platforms like Amazon Alexa and Google Home, and the associated tools, have made it so anyone can build a voice app, and this is excellent. What we have seen though is that it's fairly easy to build a voice app, but still remarkably difficult to build a great app, one that gets the user what they need, and hopefully the user comes back for more. In Mastering Voice Interfaces we want to show you how to build great voice apps. We start with the basics of voice interfaces, and how they are different from others, then dive into basic design principles that we've learned in many years building these apps in the industry. As we cover a design principle, we'll also demonstrate how to implement it with one of the established voice platforms (Google Home), and show how, though the tools are great, you don't have to go too far to have to do some custom work to get what you really want. Well I walk through many design and development techniques that some would view as advanced, but that can make a huge difference in the quality of the app. Readers of Mastering Voice Interfaces will come away with a very good understanding of what makes voice interfaces so special, learn the basic design principles are for building great voice apps, and how to actually implement those principles and create working apps. What you will learn: What makes voice special and different from other input and output modalities, and why that matters. What the best practices for the various components of the voice-first creation process What are the consequences of design and implementation choices How to create truly great voice apps that users will love Who this book is for We expect readers to have had some exposure to voice apps, at least as users. The book is written for anyone who wants a deeper understanding of the how and why of voice interface design and development. For team of developers, designers, product owners who need a shared understanding of voice interfaces.
