

deep cleaning schedule for nursing home

deep cleaning schedule for nursing home is an essential component of maintaining a safe and healthy environment for residents, staff, and visitors. Nursing homes require rigorous cleaning protocols to prevent infections and ensure compliance with health regulations. A well-structured deep cleaning schedule helps manage the thorough disinfection of high-touch surfaces, patient rooms, communal areas, and medical equipment. This article explores the importance of a deep cleaning schedule for nursing homes, outlines key areas to address, and provides practical guidance on frequency and best practices. Implementing a comprehensive cleaning regimen supports infection control, enhances resident wellbeing, and upholds facility standards. The following sections provide an in-depth overview of creating and maintaining an effective deep cleaning plan.

- Importance of a Deep Cleaning Schedule in Nursing Homes
- Key Areas to Include in the Deep Cleaning Schedule
- Recommended Frequency for Deep Cleaning Tasks
- Best Practices for Effective Deep Cleaning
- Staff Training and Compliance Monitoring

Importance of a Deep Cleaning Schedule in Nursing Homes

Maintaining a stringent deep cleaning schedule for nursing home facilities is critical to controlling the spread of infections, especially among vulnerable elderly populations. Nursing homes often house individuals with compromised immune systems, making them susceptible to illnesses caused by bacteria, viruses, and other pathogens. A systematic cleaning plan ensures that every area of the facility receives adequate attention, reducing the risk of contamination and outbreaks. Furthermore, a documented schedule supports regulatory compliance with health and safety standards set by agencies such as the Centers for Medicare & Medicaid Services (CMS) and the Centers for Disease Control and Prevention (CDC).

Infection Control and Resident Safety

Effective deep cleaning directly contributes to minimizing healthcare-associated infections (HAIs) within nursing homes. This involves thorough disinfection of surfaces that residents and staff frequently touch, such as handrails, doorknobs, medical equipment, and dining

areas. Proper cleaning disrupts the transmission chain of pathogens, enhancing resident safety and reducing hospitalization rates.

Regulatory Compliance and Quality Assurance

Health authorities mandate specific sanitation standards for long-term care facilities. Adhering to a detailed deep cleaning schedule demonstrates commitment to these regulations and helps avoid penalties or citations. Additionally, maintaining cleanliness improves the facility's reputation and quality ratings, which can influence resident satisfaction and occupancy rates.

Key Areas to Include in the Deep Cleaning Schedule

A comprehensive deep cleaning schedule for nursing homes must cover all critical areas where contamination risks are highest. These areas require targeted cleaning protocols using appropriate disinfectants and equipment. Identifying and prioritizing these zones ensures efficiency and effectiveness in hygiene management.

Resident Rooms and Bathrooms

Resident rooms should be cleaned thoroughly, focusing on bed frames, mattresses, bedside tables, light switches, and bathroom fixtures. Bathrooms demand special attention due to moisture, which can harbor mold and bacteria. Deep cleaning includes scrubbing toilets, sinks, shower stalls, and floors with hospital-grade disinfectants.

Common Areas and Dining Facilities

Areas such as lounges, activity rooms, and dining halls are high-traffic zones requiring regular disinfection. Tables, chairs, buffet counters, and serving utensils must be cleaned to prevent cross-contamination. Carpets and upholstery should also be deep cleaned periodically to remove dirt and allergens.

Medical Equipment and Supplies

Medical devices and supplies, including wheelchairs, walkers, blood pressure monitors, and thermometers, must be sanitized between uses. This prevents the transfer of pathogens between residents and staff. Equipment cleaning protocols should be integrated into the deep cleaning schedule and staff trained accordingly.

Staff Areas and Administrative Offices

Staff break rooms, locker areas, and administrative offices are often overlooked but require regular deep cleaning. These spaces can harbor germs brought in from outside and contribute to overall facility hygiene. Desks, phones, keyboards, and communal appliances should be disinfected routinely.

Recommended Frequency for Deep Cleaning Tasks

The frequency of deep cleaning activities in nursing homes varies based on area usage, infection risk, and regulatory guidelines. Establishing a clear timetable ensures consistent maintenance and resource allocation.

Daily Cleaning Tasks

High-touch surfaces such as door handles, handrails, light switches, and elevator buttons should be cleaned and disinfected daily. Resident rooms require daily cleaning of floors, bedding, and bathrooms to maintain hygiene standards.

Weekly Cleaning Tasks

Weekly deep cleaning includes wiping down walls, cleaning under furniture, sanitizing window sills, and vacuuming carpets with specialized equipment. Common areas and dining facilities also undergo more intensive cleaning on a weekly basis.

Monthly and Quarterly Cleaning Tasks

Monthly tasks involve cleaning air vents, ceiling fans, and deep carpet shampooing. Quarterly deep cleaning may include professional sanitization of HVAC systems, upholstery cleaning, and extensive disinfection of medical equipment. These intervals help reduce the buildup of dust, allergens, and pathogens.

Best Practices for Effective Deep Cleaning

Implementing deep cleaning schedules effectively requires adopting best practices that optimize cleanliness while protecting residents and staff from chemical exposure.

Use of Appropriate Cleaning Agents

Select disinfectants that are EPA-approved for healthcare settings and effective against common pathogens such as MRSA, *C. difficile*, and influenza viruses. Follow manufacturer

guidelines for dilution, contact time, and safety precautions to maximize efficacy.

Systematic Cleaning Procedures

Adopt a top-to-bottom, clean-to-dirty approach to prevent recontamination. Use color-coded cleaning cloths and tools to differentiate between areas (e.g., bathrooms vs. resident rooms). This reduces cross-contamination risks and enhances cleaning efficiency.

Proper Personal Protective Equipment (PPE)

Staff performing deep cleaning should wear appropriate PPE, including gloves, masks, and gowns, to protect themselves from exposure to harmful chemicals and infectious agents. Training on correct PPE use is essential for safety.

Documentation and Quality Checks

Maintain detailed records of cleaning tasks, frequencies, and staff responsible. Regular audits and inspections help identify gaps and ensure adherence to the schedule. Feedback mechanisms promote continuous improvement in cleaning quality.

Staff Training and Compliance Monitoring

Training nursing home staff on the importance and methods of deep cleaning is vital for consistent implementation. Ongoing education ensures that personnel remain informed about evolving cleaning standards and techniques.

Training Programs and Workshops

Develop comprehensive training modules covering infection control principles, cleaning protocols, chemical safety, and equipment use. Hands-on workshops and refresher courses reinforce skills and knowledge.

Monitoring and Performance Evaluation

Establish performance metrics and conduct periodic assessments of cleaning effectiveness. Use checklists, supervisor observations, and resident feedback to monitor compliance. Address deficiencies promptly through targeted retraining or process adjustments.

Encouraging Accountability and Teamwork

Foster a culture of accountability by clearly defining roles and responsibilities within the cleaning team. Encourage communication and collaboration to address challenges and

maintain high standards of facility hygiene.

Frequently Asked Questions

What is a deep cleaning schedule for a nursing home?

A deep cleaning schedule for a nursing home is a planned routine that outlines the frequency and specific tasks required to thoroughly clean and disinfect all areas of the facility to maintain a safe and healthy environment for residents and staff.

How often should deep cleaning be performed in a nursing home?

Deep cleaning in a nursing home should typically be performed at least monthly, with certain high-touch areas cleaned more frequently, such as weekly or bi-weekly, depending on the facility's policies and infection control guidelines.

Which areas in a nursing home require the most attention during deep cleaning?

High-priority areas for deep cleaning include resident rooms, bathrooms, dining areas, common rooms, nursing stations, and high-touch surfaces like door handles, handrails, and medical equipment.

What are the benefits of having a deep cleaning schedule in a nursing home?

A deep cleaning schedule helps reduce the risk of infections, improves overall hygiene, enhances resident comfort, complies with health regulations, and promotes a safe environment for both residents and staff.

Who is responsible for carrying out deep cleaning in nursing homes?

Typically, trained housekeeping and sanitation staff are responsible for deep cleaning tasks in nursing homes, often overseen by facility management or infection control teams to ensure standards are met.

What cleaning products should be used for deep cleaning in nursing homes?

Cleaning products used should be EPA-approved disinfectants effective against common pathogens, non-toxic to residents, and suitable for healthcare environments, following manufacturer guidelines and safety protocols.

How can nursing homes ensure compliance with deep cleaning schedules?

Nursing homes can ensure compliance by maintaining detailed cleaning logs, conducting regular audits, providing staff training, and using checklists to track completed tasks as part of their quality assurance programs.

Additional Resources

1. *Deep Cleaning Protocols for Nursing Homes: A Comprehensive Guide*

This book offers a detailed framework for creating and implementing effective deep cleaning schedules in nursing homes. It covers best practices, safety standards, and environmentally friendly cleaning agents. Readers will find step-by-step instructions tailored to healthcare environments, ensuring both resident safety and regulatory compliance.

2. *Sanitation and Hygiene in Long-Term Care Facilities*

Focused on maintaining hygiene in nursing homes, this book explores daily and periodic deep cleaning routines. It emphasizes infection control and the role of cleaning in preventing disease outbreaks. Practical tips and checklists help staff maintain a sterile and comfortable environment for residents.

3. *The Ultimate Nursing Home Cleaning Schedule Planner*

Designed as a hands-on planner, this book helps administrators and cleaning staff organize their deep cleaning tasks efficiently. It includes customizable schedules, task prioritization strategies, and resource management tips. The planner facilitates consistent cleanliness, reducing health risks in nursing homes.

4. *Infection Control Through Cleaning: Nursing Home Best Practices*

This title delves into the critical link between cleaning practices and infection control in nursing homes. It presents evidence-based methods to minimize microbial contamination through targeted deep cleaning. The book also discusses staff training and monitoring techniques to uphold high sanitation standards.

5. *Green Cleaning Strategies for Nursing Homes*

Addressing environmental concerns, this book advocates for sustainable cleaning practices in nursing homes. It provides guidance on using eco-friendly products and reducing chemical exposure for residents and staff. Readers learn how to balance deep cleaning effectiveness with environmental responsibility.

6. *Facility Management: Scheduling and Executing Deep Cleaning in Nursing Homes*

A practical resource for facility managers, this book outlines how to develop and maintain effective deep cleaning schedules. It covers coordination among cleaning teams, budgeting, and compliance with health regulations. The book includes case studies demonstrating successful cleaning program implementations.

7. *Cleaning and Disinfection in Elder Care Facilities*

This book provides a thorough overview of cleaning and disinfection practices specific to elder care settings. It highlights the importance of timing, product selection, and technique

in deep cleaning routines. The content supports staff in creating safer living spaces for vulnerable populations.

8. *Daily to Deep: A Cleaning Schedule Guide for Nursing Homes*

Offering a layered approach, this guide differentiates between daily maintenance cleaning and scheduled deep cleaning tasks. It helps nursing home staff allocate time and resources effectively to maintain optimal cleanliness. The book features templates and reminders to keep cleaning programs on track.

9. *Regulatory Compliance and Cleaning Standards in Nursing Homes*

This book focuses on aligning deep cleaning schedules with local and federal regulations in nursing home settings. It explains the required documentation, inspection preparedness, and quality assurance measures. Healthcare administrators will find valuable insights into managing cleaning standards to avoid penalties and ensure resident safety.

Chapter 5: Documentation and Compliance
Maintaining Cleaning Logs and Records
Meeting Regulatory Requirements (e.g., OSHA, CDC guidelines)
Utilizing Technology for Tracking and Reporting
Conclusion: Sustaining a Clean and Healthy Environment

Deep Cleaning Schedule for Nursing Homes: A Comprehensive Guide

Introduction: The Importance of Deep Cleaning in Nursing Homes

Nursing homes provide essential care for vulnerable individuals, making maintaining a clean and hygienic environment paramount. Beyond the daily cleaning routines, deep cleaning plays a crucial role in infection prevention, resident well-being, and regulatory compliance. Deep cleaning goes beyond surface-level cleaning; it targets hard-to-reach areas and employs more rigorous techniques to eliminate germs, allergens, and potential health hazards. A well-structured deep cleaning schedule significantly reduces the risk of healthcare-associated infections (HAIs), improves air quality, and contributes to a more comfortable and dignified living environment for residents. Neglecting deep cleaning can lead to serious health consequences, increased healthcare costs, and potential legal repercussions. This ebook provides a detailed guide to help nursing home administrators and staff develop and implement an effective deep cleaning schedule.

Chapter 1: Developing a Customizable Deep Cleaning Schedule

Creating a comprehensive deep cleaning schedule requires careful planning and consideration of various factors. The frequency of deep cleaning should be determined based on the specific needs of the nursing home, the number of residents, and the potential risk factors. While a general guideline might suggest weekly or monthly deep cleaning for certain areas, high-traffic areas like the dining room or common bathrooms may require more frequent attention.

Prioritizing Areas Based on Risk: Not all areas within a nursing home carry the same level of infection risk. Bathrooms, resident rooms, and areas where medical procedures are performed should be prioritized for more frequent deep cleaning. These areas require meticulous attention to detail, including disinfecting high-touch surfaces like door handles, light switches, and bedrails.

Staff Training and Responsibilities: Effective deep cleaning is not merely about following a schedule; it's about ensuring staff are adequately trained and equipped to perform the tasks correctly and safely. Comprehensive training should cover proper cleaning techniques, the use of appropriate cleaning products, and the importance of infection control protocols. Clear responsibilities should be assigned to ensure accountability and avoid overlaps or omissions. A detailed checklist can ensure that all tasks are completed thoroughly.

Chapter 2: Room-by-Room Deep Cleaning Procedures

A detailed, room-by-room approach ensures thoroughness and consistency.

Resident Rooms: Deep cleaning resident rooms involves more than just changing linens and tidying up. It includes:

Cleaning and disinfecting all surfaces, including bedside tables, walls, windowsills, and floorboards. Thoroughly cleaning and disinfecting the bathroom within the room, including the toilet, sink, shower/tub, and floor.

Vacuuming or mopping the floor, paying attention to corners and under furniture.

Cleaning and disinfecting any medical equipment in the room, such as oxygen tanks or suction machines.

Bathrooms: Bathrooms require meticulous cleaning due to their high risk of contamination. This includes:

Cleaning and disinfecting toilets, sinks, showers/tubs, and floors with appropriate disinfectants.

Removing mildew and soap scum.

Cleaning and disinfecting all fixtures and fittings.

Replacing shower curtains and mats as needed.

Common Areas: Common areas such as the lobby, dining room, and activity rooms require frequent deep cleaning to maintain hygiene and prevent the spread of infection. This includes:

Vacuuming or mopping floors thoroughly.

Cleaning and disinfecting all surfaces, including tables, chairs, countertops, and door handles.

Cleaning and disinfecting light switches, handrails, and other high-touch surfaces.

Emptying and cleaning trash receptacles.

Kitchen and Laundry Areas: These areas require special attention to maintain food safety and hygiene. Deep cleaning involves:

Thoroughly cleaning and sanitizing all food preparation surfaces and equipment.

Cleaning and disinfecting refrigerators, ovens, and other appliances.

Cleaning and disinfecting laundry equipment, including washing machines, dryers, and hampers.

Cleaning and disinfecting floors and walls.

Medical Equipment and Supplies: Medical equipment requires specific cleaning and disinfection procedures to prevent cross-contamination. This includes:

Following manufacturer's instructions for cleaning and disinfecting equipment.

Using appropriate disinfectants and sterilization techniques.

Proper disposal of contaminated materials.

Chapter 3: Specialized Cleaning Procedures

Infection Control Protocols: Implementing strict infection control protocols is crucial. This involves adhering to established guidelines from organizations like the CDC and following proper hand hygiene practices, using personal protective equipment (PPE), and employing appropriate disinfectants.

Handling Biohazardous Waste: Nursing homes generate biohazardous waste, requiring specific handling and disposal procedures to prevent exposure and contamination. This includes proper labeling, storage, and disposal of sharps, soiled linens, and other infectious materials.

Cleaning and Disinfecting Medical Equipment: Medical equipment needs to be cleaned and disinfected according to manufacturer guidelines to prevent the spread of infection.

Maintaining Air Quality: Regular maintenance of HVAC systems, including filter changes and cleaning, is essential for maintaining good air quality and reducing the risk of airborne infections.

Chapter 4: Product Selection and Safety

Choosing the right cleaning products is crucial. Prioritize EPA-registered disinfectants effective against a wide range of pathogens. Proper handling and storage of cleaning supplies are also vital to prevent accidents and ensure safety. Staff should always wear appropriate PPE, including gloves, masks, and eye protection, when handling cleaning chemicals.

Chapter 5: Documentation and Compliance

Meticulous record-keeping is essential. Maintaining detailed cleaning logs and records demonstrates compliance with regulatory requirements. These records should clearly indicate the date, time, area cleaned, cleaning agents used, and staff responsible. Utilizing cleaning management software can streamline the process and improve tracking.

Conclusion: Sustaining a Clean and Healthy Environment

A robust deep cleaning schedule is not a one-time task but a continuous process. Regular review and adjustment of the schedule are crucial to adapt to changing needs and ensure ongoing effectiveness. Consistent implementation of these procedures, coupled with staff training and ongoing monitoring, will create a cleaner, healthier, and safer environment for residents and staff alike.

FAQs:

1. How often should a nursing home undergo deep cleaning? Frequency varies depending on the area and risk level, ranging from weekly to monthly.
2. What types of disinfectants are recommended for nursing homes? EPA-registered disinfectants effective against a broad spectrum of pathogens.
3. What PPE should staff wear during deep cleaning? Gloves, masks, eye protection, and aprons are recommended.
4. How should biohazardous waste be handled? According to local, state, and federal regulations, typically involving specialized containers and disposal services.
5. What are the legal requirements for nursing home cleaning? Regulations vary by location, but compliance with OSHA and CDC guidelines is crucial.
6. How can technology assist with deep cleaning schedules? Software can track cleaning tasks, generate reports, and improve efficiency.
7. What training is necessary for nursing home cleaning staff? Training should cover proper cleaning techniques, use of disinfectants, and infection control protocols.
8. How can a nursing home ensure compliance with deep cleaning schedules? Regular audits, inspections, and documentation are essential.
9. What are the consequences of inadequate deep cleaning in nursing homes? Increased risk of

HAIs, potential legal action, and damage to the facility's reputation.

deep cleaning schedule for nursing home: Nursing Home Administration, 6th Edition and The Licensing Exam Review Guide in Nursing Home Administration, 6th Edition SET James E. Allen, PhD, MSPH, NHA, IP, 2011-02-01 This set includes Nursing Home Administration, 6th Edition and The Licensing Exam Review Guide in Nursing Home Administration, 6th Edition.

deep cleaning schedule for nursing home: Cleaning Routine Planner Character Designs, 2019-04-22 Housekeeping Checklist Notebook for Cleaning and Organizing Your House Cleaning Routine: Cleaning Checklist for Keep The House Tidy and Clean- Housekeeping, Daily Cleaning, Weekly Cleaning, Monthly Cleaning, Yearly (Annually) Cleaning and Bi-Annually Cleaning. All this options are available inside the notebook. These cleaning schedule offer you a handy cleaning checklist for writing down your weekly cleaning chores including daily tasks and things to be taken care of in the home on a weekly basis. Home cleaning schedule and home organizer planner is designed to guide you in a deep clean, as well as assist with your regular housekeeping routine. House Cleaning Checklist: Household Planner, Daily Routine Planner, Cleaning and Organizing Your House includes this specifications: - White paper - 120 Pages - Glossy paperback cover - Size at 8.5 x 11 in / 21.59 x 27.94 cm

deep cleaning schedule for nursing home: Nursing Home Administration Michael Mileski, DC, MPH, MHA, MSHEd, LNFA, FACHCA, Rebecca McClay, DNP, MS, ACNPC-AG, CCRN-CMC-CSC, TCRN, NPD-BC, 2022-08-12 This book is an excellent resource for students, educators, and long-term care administrators. This engaging eighth edition provides useful knowledge and up-to-date information to all those interested in long-term care management. --Doody's Review Service, 5 stars Now in its eighth edition, Nursing Home Administration remains the authoritative textbook detailing the nursing facility administrator role, what they do, how they think, and how they lead. By breaking down the art of administration into its basic, need-to-know tasks—forecasting, planning, organizing, staffing, directing, controlling quality, innovating, and marketing—this text provides the essential context for managing and leading nursing homes and skilled nursing facilities. Thoroughly updated to include the four domains of practice as put forth by the National Association of Long-Term Care Administrator Boards (NAB) for 2022 licensure examination and beyond, this textbook is complete with essential context for the domains and associated competencies to better prepare students for the required NAB examination. With revised sections addressing new federal regulations and laws affecting the field, best practices in residential

care, and refreshed examples and cases, this text continues to set students up for success in working as a nursing facility administrator. Updated sections address changes within the residential care continuum, provide further information on patient-driven payment models and value-based care, and inform current practices for marketing and controlling quality within the long-term care facility. Chapter boxes reflect common pitfalls in practice while real-life case studies and critical thinking exercises, including a What Do I Do Now? section that concludes all chapters, encourage students to consider challenges they may experience in the field. In addition to updated domains of practice—care, services, and supports; operations; environmental and quality; and leadership and strategy—the book describes how core components fit together. New to the Eighth Edition: Includes the updated 2022 domains of practice as they relate to the licensing examination standards of the National Association of Long-Term Care Administrator Boards (NAB) Replete with information on new federal laws, requirements, and regulations including links to important resources such as the Minimum Data Set 3.0 Provides insight into the impact the COVID-19 pandemic has and will create for managing a long-term care facility Introduces Common Pitfalls in Practice sections and What Do I Do Now? boxes in each chapter, designed to spark critical thinking and discussion Updated figures, tables, and references throughout Key Features: Provides an in-depth discussion of nursing facility administration Utilizes current data of nursing facility administration and skilled nursing care within the context of the larger long-term care field Case studies throughout the textbook address real-world situations and experiences for administrators and managers in nursing facility administration and skilled nursing care Purchase includes digital access for use on most mobile devices or computers Qualified Instructors can gain access to the book's accompanying Instructor's Manual

deep cleaning schedule for nursing home: *Senior Living Communities* Benjamin W. Pearce, 1998-11-23 The American Association of Retired Persons estimates that the number of communities for seniors has doubled in the past ten years and will more than double again before the 21st century. This growth has meant that new administrators are often learning by trial and error the complicated task of delivering high quality and consistent services to elderly persons.

deep cleaning schedule for nursing home: Nursing Home Administration, Sixth Edition James E. Allen, PhD, MSPH, NHA, IP, 2011-02-25 Named a 2013 Doody's Essential Purchase! The sixth edition of Nursing Home Administration contains essential information to prepare an individual for licensure and employment as a nursing home administrator. This book addresses all regulatory pieces of information to provide readers with an overview of the entire process of managing a nursing facility. This edition has been updated to reflect the most accurate and up-to-date information to reflect new legislation and regulations passed since previous edition in 2008. This textbook serves as a roadmap for studying and understanding all the various requirements-management, human resources, finance and business, industry laws and regulations, and patient care. It demonstrates how all components fit together to form the coordinated activity set required of a successful nursing home administrator. Key Features: Formatted according to licensing examination and guidelines of the National Association of Boards of Examiners of Nursing Home Administrators New federal guidelines to surveyors New resident assessment instrument Updated figures and tables New life safety code inspection processes New ICDM-10 (International Classification of Diseases-Modified) Sub-set of federal forms included in appendices Web references to enable the reader to successfully navigate the nursing home administration field

deep cleaning schedule for nursing home: **The Gentle Art of Swedish Death Cleaning** Margareta Magnusson, 2018-01-02 *The basis for the wonderfully funny and moving TV series developed by Amy Poehler and Scout Productions* A charming, practical, and unsentimental approach to putting a home in order while reflecting on the tiny joys that make up a long life. In Sweden there is a kind of decluttering called döstädning, dö meaning “death” and städning meaning “cleaning.” This surprising and invigorating process of clearing out unnecessary belongings can be undertaken at any age or life stage but should be done sooner than later, before others have to do it for you. In *The Gentle Art of Swedish Death Cleaning*, artist Margareta Magnusson, with

Scandinavian humor and wisdom, instructs readers to embrace minimalism. Her radical and joyous method for putting things in order helps families broach sensitive conversations, and makes the process uplifting rather than overwhelming. Margareta suggests which possessions you can easily get rid of (unworn clothes, unwanted presents, more plates than you'd ever use) and which you might want to keep (photographs, love letters, a few of your children's art projects). Digging into her late husband's tool shed, and her own secret drawer of vices, Margareta introduces an element of fun to a potentially daunting task. Along the way readers get a glimpse into her life in Sweden, and also become more comfortable with the idea of letting go.

deep cleaning schedule for nursing home: *Housekeeping for Historic Homes and House Museums* Melissa M. Heaver, 2004

deep cleaning schedule for nursing home: *Clean My Space* Melissa Maker, 2017-03-07 The wildly popular YouTube star behind Clean My Space presents the breakthrough solution to cleaning better with less effort Melissa Maker is beloved by fans all over the world for her completely re-engineered approach to cleaning. As the dynamic new authority on home and living, Melissa knows that to invest any of our precious time in cleaning, we need to see big, long-lasting results. So, she developed her method to help us get the most out of our effort and keep our homes fresh and welcoming every day. In her long-awaited debut book, she shares her revolutionary 3-step solution: • Identify the most important areas (MIAs) in your home that need attention • Select the proper products, tools, and techniques (PTT) for the job • Implement these new cleaning routines so that they stick Clean My Space takes the chore out of cleaning with Melissa's incredible tips and cleaning hacks (the power of pretreating!) her lightning fast 5-10 minute "express clean" routines for every room when time is tightest, and her techniques for cleaning even the most daunting places and spaces. And a big bonus: Melissa gives guidance on the best non-toxic, eco-conscious cleaning products and offers natural cleaning solution recipes you can make at home using essential oils to soothe and refresh. With Melissa's simple groundbreaking method you can truly live in a cleaner, more cheerful, and calming home all the time.

deep cleaning schedule for nursing home: *Guidelines for Nursing Homes* , 2003

deep cleaning schedule for nursing home: *Infection Control Guidelines for Long-term Care Facilities* Laboratory Centre for Disease Control (Canada), 1994 The first Infection control guidelines for long-term care facilities were published in 1986. Since that time the interest in, and knowledge of, the requirements of infection control programs for long-term care facilities has steadily increased. This document presents the second version and looks at the following points: organizational structure of an infection control program; environmental concerns; departments and services; management of specific care situations; occupational health; and, epidemic investigation and control.

deep cleaning schedule for nursing home: *Quality of Life in Nursing Homes* United States. Congress. House. Select Committee on Aging. Subcommittee on Human Services, 1986

deep cleaning schedule for nursing home: *Community Resources for Older Adults* Robbyn R. Wacker, Karen A. Roberto, 2018-06-13 Community Resources for Older Adults provides comprehensive, up-to-date information on programs, services, and policies pertaining to older adults. Authors Robbyn R. Wacker and Karen A. Roberto build reader awareness of programs and discuss how to better understand help-seeking behavior, as well as explain ways to take advantage of the resources available to older adults. The substantially revised Fifth Edition includes new topics and updated research, tables, and figures to help answer key questions about the evolution and utilization of programs for older adults and the challenges that service providers face.

deep cleaning schedule for nursing home: *Nursing Home Administration* James E. Allen, PhD, MSPH, NHA, IP, 2015-11-04 Sixth Edition Named a 2013 Doody's Essential Purchase! A detailed road map of essential knowledge for obtaining licensure and employment as a nursing home administrator, the Seventh Edition of this classic text is updated to reflect the 2014 National Association of Boards of Examiners of Nursing Home Administrators (NAB) Domains of Practice. With more than 50 new topics, it comprehensively addresses all new regulations for managing a

nursing facility along with a detailed overview of the skills and knowledge required to be a successful administrator. The Seventh Edition responds to the many changes that have recently occurred in the long-term care field. It provides a completely new Minimum Data Set 3.0 (MDS), 2015 Federal Requirements for Electronic Records, the new International Classification of Diseases, Tenth Revision, Clinical Modification (ICD-10-CM), new Quality Measures, updated Instructions for Making Data as per the Centers for Medicare and Medicaid, the impacts of the Affordable Care Act (ACA), and several new federal regulations. The Seventh Edition clearly describes what nursing home managers do, how they think, and how they lead. It breaks down the art of management into its basic tasks—forecasting, planning, organizing, staffing, directing, controlling quality, innovating, and marketing—and examines them in depth. The text pinpoints all of the separate components of nursing home administration—management, human resources, team dynamics, conflict resolution, finance and business, industry laws and regulations, and patient care—and describes how they fit together to form the coordinated activity set required of a successful nursing home administrator. Abundant real-life case studies, chapter objectives, and critical thinking questions greatly enhance learning. Mastering this text will prepare students to take—and pass with a depth of understanding—the nationally required NAB examination. New to the Seventh Edition: 2014 updated NAB Domains of Practice: Management, Human Resources, Finance, Environment, and Resident Care Introduces over 50 new topics including team dynamics, conflict resolution, and basic principles of nursing and social work Vast changes wrought by new technology and patient data New information on safety and disaster preparedness Updates signs and symptoms of abuse, neglect, and exploitation Provides new technology vocabulary Reorganized for quick access to information A completely new Minimum Data Set 3.0 (MDS) 2015 Federal Requirements for Electronic Records International Classification of Diseases, Tenth Revision, Clinical Modification (ICD-10-CM) New quality measures Impacts of the ACA on long-term care Updated tables and figures New federal regulations for quality of care approaches for residents with dementia; additional medication issues; infection control; residents' rights to establish advance directives; and defining unnecessary drugs Key Features: Provides in-depth coverage of all aspects of nursing home administration Includes current data on the field of long-term care Replete with real-life case studies, learning objectives, and critical thinking questions Formatted according to licensing examination and guidelines of the National Association of Boards of Examiners of Nursing Home Administrators Prepares students for the nationally required NAB exam Accompanying Instructor's Manual

deep cleaning schedule for nursing home: *Medical and Dental Expenses* , 1990

deep cleaning schedule for nursing home: What Can be Done in Nursing Homes United States. Congress. Senate. Special Committee on Aging. Subcommittee on Long-Term Care, 1975

deep cleaning schedule for nursing home: Environmental Health and Housing Jill Stewart, Zena Lynch, 2018-06-13 The second edition of *Environmental Health and Housing* has been completely updated to cover the contemporary issues in public health that have emerged in recent years. With a theory and practice approach to public health, this edition focuses more on population health, health protection and improvement, and inter-agency approaches to effective intervention in housing and health through evidence-based practice. It provides the ideal introduction to the area, covering policy and strategy in housing, housing and inequality, housing inclusion, and the public health agenda. It provides a renewed focus on research into evidence-based housing and health issues, which have become subjects of growing international interest in recent years. This edition includes more case studies, reflection, and a greater emphasis on wider living environments. It also includes major pieces of new legislation, most notably the Housing Act 2004 and the Housing and Planning Act 2016, as well as related regulations.

deep cleaning schedule for nursing home: Daily Labor Report , 1991

deep cleaning schedule for nursing home: Fragments: Growing Up Bohemian Poor In Dementia's House Susan Canavarro, 2010-03-29 *Fragments: Growing up Bohemian Poor In Dementia's House*, a collection of illustrated short stories about growing up bohemian poor with an

artist father and crazy, zany mother, paints the author's life as a child, teenager, and adult dealing with a mentally ill mother who slid into dementia in her later years. Memories, triggered by houses the author lived in from 1950 to 1964 and later, physical houses, metaphorical houses or spaces, or a house of dementia, transport you through turmoil and joy. A quick read, it's got humor, tragedy, nudity, and sex.

deep cleaning schedule for nursing home: Already Toast Kate Washington, 2021-03-16 The story of one woman's struggle to care for her seriously ill husband—and a revealing look at the role unpaid family caregivers play in a society that fails to provide them with structural support. Already Toast shows how all-consuming caregiving can be, how difficult it is to find support, and how the social and literary narratives that have long locked women into providing emotional labor also keep them in unpaid caregiving roles. When Kate Washington and her husband, Brad, learned that he had cancer, they were a young couple: professionals with ascending careers, parents to two small children. Brad's diagnosis stripped those identities away: he became a patient and she his caregiver. Brad's cancer quickly turned aggressive, necessitating a stem-cell transplant that triggered a massive infection, robbing him of his eyesight and nearly of his life. Kate acted as his full-time aide to keep him alive, coordinating his treatments, making doctors' appointments, calling insurance companies, filling dozens of prescriptions, cleaning commodes, administering IV drugs. She became so burned out that, when she took an online quiz on caregiver self-care, her result cheerily declared: "You're already toast!" Through it all, she felt profoundly alone, but, as she later learned, she was in fact one of millions: an invisible army of family caregivers working every day in America, their unpaid labor keeping our troubled healthcare system afloat. Because our culture both romanticizes and erases the realities of care work, few caregivers have shared their stories publicly. As the baby-boom generation ages, the number of family caregivers will continue to grow. Readable, relatable, timely, and often raw, Already Toast—with its clear call for paying and supporting family caregivers—is a crucial intervention in that conversation, bringing together personal experience with deep research to give voice to those tasked with the overlooked, vital work of caring for the seriously ill.

deep cleaning schedule for nursing home: The Science of Cleaning: Use the Power of Chemistry to Clean Smarter, Easier, and Safer-With Solutions for Every Kind of Dirt Dario Bressanini, 2024-05-21 The definitive, science-backed guide to cleaning everything in your home in a safe, sustainable, evidence-based way "A great reference for anyone stumped by reluctant-to-leave dirt—and far cheaper than hiring a professional."—Booklist Countless cleaning hacks for every kind of household dirt may vie for our attention, but how do we know which ones really work and which ones will only leave you with a sticky mess that doesn't actually do the job? Scientific evidence comes to the rescue, as chemistry professor Dario Bressanini teaches you everything worth knowing about cleaning agents and processes (and dispels plenty of myths, too). He answers all of our most pressing housekeeping questions: Is it more efficient to wash dishes in the sink or in the dishwasher? Does bleach remove dirt? Which cleaning supplies should I buy, and which can I make at home? Can vinegar and baking soda actually unclog your drain? How can I most effectively tackle different types of stains? What can get rid of that stuff on my showerhead? Bressanini covers subjects like these by digging into chemistry basics such as solubility, pH, and concentration, bringing them out of the classroom and into the real-world chores that we deal with every day. Laundry, dishes, sinks, bathtubs, counters, floors, and more—no matter what you're cleaning, this book explains how to choose the right tools for the task, save yourself unnecessary effort, and stay eco-friendly by avoiding waste. The Science of Cleaning reminds us that science can be both useful and exciting. With Bressanini's help, you can keep your home, your belongings, and yourself clean—with the confidence that only centuries of advancements in chemistry can provide.

deep cleaning schedule for nursing home: An Ocean Apart Sarah Lee, 2022-08-18 'A beautiful story of friendship, new beginnings and love . . . It's a love letter to the women who left behind everything to help heal our country and establish the NHS. I could not have loved this more

and thought about it long after I turned the last page.' - Kate Thompson, author of *The Little Wartime Library* Inspired by real life stories of the Windrush Generation and her mother's own experiences as a nurse coming to Britain from the Caribbean, Sarah Lee's debut novel *An Ocean Apart* is a must for fans of *Call the Midwife*. It's 1954 and, in Barbados, Ruby Haynes spots an advertisement for young women to train as nurses for the new National Health Service in Great Britain. Her sister, Connie, takes some persuading, but soon the sisters are on their way to a new country - and a whole new world of experiences. As they start their training in Hertfordshire, they discover England isn't quite the promised land; for every door that's opened to them, the sisters find many slammed in their faces. And though the girls find friendships with their fellow nurses, Connie struggles with being so far from home, and keeping secret the daughter she has left behind in search of a better life for the both of them . . . 'A glorious triumph of a book full of characters that feel like real friends, so atmospheric, compelling and nostalgic, I adored it.' - Alex Brown, author of *A Postcard from Italy*

deep cleaning schedule for nursing home: Unraveled Elizabeth L. Krause, 2009-09-17 Deftly bridging literary conventions, this compelling work exposes the cultural origins of a quiet revolution that occurred over the course of the twentieth century. Elizabeth Krause combines novelistic and ethnographic techniques to illuminate population dynamics that have raised alarm across Europe and the United States, and manifested, for example, in Italy's extremely low birthrate. But what actually motivates people to have fewer children? Krause turns to the evocative story of one woman, Emilia Raugei, who was born in a Tuscan hill town in 1920 and worked as a straw weaver in a rapidly globalizing economy, to better understand this question. Based on extensive fieldwork, including indepth conversations with Emilia herself, Krause draws on her rich and unconventional memories to create an engaging portrait of life in a rural village during Mussolini's rise to power-it is a tale of migration, love and loss, political turmoil, and the struggle to make a living during hard times. Giving voice to a largely silent history that is at once local and global, *Unraveled: A Weaver's Tale of Life Gone Modern* will challenge us to find innovative approaches to understanding the transformative shift to a modern way of life.--Publisher's website.

deep cleaning schedule for nursing home: Oxford Handbook of Geriatric Medicine Lesley K. Bowker, James D. Price, Kunal S. Shah, Sarah C. Smith, 2018-03-09 This new edition of the *Oxford Handbook in Geriatric Medicine* has been expanded and updated to reflect the substantial changes in clinical practice since the previous edition, including the Francis report and the impact on care for the older patient, the National Dementia Strategy and screening, and the evolution of the role of Geriatricians in other specialities. It includes new material on risk scoring management of TIA, and a new chapter on the older surgical patient. With an ageing population, geriatric medicine is increasingly central to emergency and internal medicine in hospital settings and in general practice. Diseases are more common in the older person, and can be particularly difficult to assess and to treat effectively in a field that has limited evidence, yet makes up a substantial proportion of the work of most clinicians. Using clinical vignettes and how-to boxes to provide practical advice on common problems, this is a practical, accessible, and essential handbook for all medical staff who manage older patients.

deep cleaning schedule for nursing home: Oxford Handbook of Geriatric Medicine Lesley Bowker, James Price, Sarah Smith, 2012-08-09 In an ageing population, geriatric medicine has become central to general practice, and to emergency and general internal medicine in the hospital setting. Diseases are more common in the older person, and can be particularly difficult to assess and to treat effectively in a field that has limited evidence, yet makes up a substantial proportion of the work of most clinicians. Fully updated, this second edition of the Oxford Handbook of Geriatric Medicine includes all the information required to deliver effective geriatric care. Guidance is given on a range of key treatment areas, indicating where practice differs from that of younger adults or is ill informed by evidence, where dangers lurk for the inexperienced clinician, and on the many ethical and clinical dilemmas common in geriatric practice. This accessible handbook is essential reading for all junior doctors and specialist trainees in geriatric medicine and general internal medicine, and for all medical and nursing staff who manage older people.

deep cleaning schedule for nursing home: My Story His Glory Janice Easley, 2011-02-02 Janice Easley has survived child rape, witness murder in her family home, had two abortion and ask God's forgiveness and God gave her triplets. "Became a drug addict in and out of jail until she seen a light from heaven that gave her a jail ministry, and prayer ministries for the Elderly".

deep cleaning schedule for nursing home: Portable Faith Sarah Cunningham, 2013-03-01 Help church members to talk their faith into their everyday worlds. Portable Faith provides simple but effective ways to help people go public with their faith. Author Sarah Cunningham provides samples of activities and exercises that encourage people to meet others in the community—for example: begin by mapping out where your church members live; create a fellowship meal of ethnic foods that come from the church's surrounding community; start a reading group at work; or simply participate in a neighborhood watch. These activities are flexible and workable even with small budgets. They can be done by individuals, Bible study groups, Sunday morning classes, or by the entire church. By the end of the book, Sarah Cunningham hopes that readers will look at their church community with new eyes.

deep cleaning schedule for nursing home: Textbook of Palliative Nursing Department of Nursing Education and Research City of Hope National Medical Center Betty R. Ferrell Research Scientist, Supportive Care Program Nessa Coyle Director, Pain & Palliative Service Department of Neurology Memorial Sloan-Kettering Cancer Center, 2005-11-10 Originally published in 2001, the Textbook of Palliative Nursing has become the standard text for the field of hospice and palliative care nursing. In this new edition, the authors and editors have updated each chapter to ensure that the content is evidence-based and current references are included. They also have retained the important focus on case studies throughout the text and practical, clinically-relevant tables, figures, and other resources. Like the previous edition, this text has an introductory section of the general principles of palliative care followed by a comprehensive section on symptom assessment and management encompassing twenty-one different symptoms. Other key sections include psychosocial support and spiritual care, providing holistic perspective on care of patients facing advanced disease. The text also includes an innovative section on special populations addressing those most in need of palliative care. The textbook is a useful resource for all nurses with the excellent section on end-of-life care across settings. In this new edition, the pediatric palliative care section has been greatly expanded and includes seven separate chapters on pediatric care. It includes a section on special issues addressing topics such as ethical considerations, nursing research, and public policy perspectives and concludes with a section presenting models of excellence including six international models. This edition also offers a narrative on dying based on a spouse's perspective. The text includes an appendix with an extensive list of resources for nurses in the field.

deep cleaning schedule for nursing home: Fullness of Heart Joyce Teixeira, 2000-09 Paula Johnson always claimed money doesn't influence choice, but is it true? When notified of an unexpected inheritance she is shaken. Crying, she wondered if it was over Charley's death or for the lost innocence of those bohemian years in Paris...counter-culture indeed, revolutionaries of peace.

'What a message we gave our kids...They were presented with drugs and sexuality as a recreational sport and advertising tool; of race and class as a primary identity instead of as pieces of the whole. We intended to give them freedom to define themselves. Instead our generation only confused them.' She had dated since her husband died. The fact of being a white woman who had married a black man was part of her identity that put her in unspoken limbo. She missed the years with Roy...when something about their alchemy together prevented any prejudice they encountered from touching them...it only scraped the surface. Lack of money could no longer be her excuse for accepting limited relationships and addictive behavior. The years suddenly knit together as a Cat's Cradle when pulling the strands tight...Fullness of heart...pervaded her senses.

deep cleaning schedule for nursing home: *The Detective's Daughter Series Boxset* Lesley Thomson, 2021-08-05 A complete e-Book boxset of the novels in Lesley Thomson's bestselling Detective's Daughter series. Stella Darnell, a cleaner, is the detective's daughter. When her father died, she discovered old case files in his attic while clearing out his house. Follow Stella and Jack's story with this complete eBook boxset, including books 1-8: The Detective's Daughter Ghost Girl The Detective's Secret The House with No Rooms The Dog Walker The Death Chamber The Playground Murders The Distant Dead The first novel in the series, The Detective's Daughter, became an ebook phenomenon in 2013, staying at number 1 in the digital charts for 3 months. Since then, the series has gone on to sell 800,000 copies worldwide. 'Lesley Thomson is a class above' Ian Rankin 'Stella Darnell is without doubt one of the most original characters in British crime fiction' Crime Review

deep cleaning schedule for nursing home: *Poverty Law, Policy, and Practice* Juliet Brodie, Clare Pastore, Ezra Rosser, Jeffrey Selbin, 2020-09-14 The purchase of this ebook edition does not entitle you to receive access to the Connected eBook on CasebookConnect. You will need to purchase a new print book to get access to the full experience including: lifetime access to the online ebook with highlight, annotation, and search capabilities, plus an outline tool and other helpful resources. Poverty Law, Policy, and Practice is organized around an overview and history of federal policies, significant poverty law cases, and major government antipoverty programs—welfare, housing, health, legal aid, etc.—which map onto important theoretical, doctrinal, policy, and practice questions. The book includes academic debates about the nature and causes of poverty as well as various texts that help illuminate the struggles faced by poor people. Throughout, it contains reading selections highlighting different perspectives on whether poverty is primarily caused by individual actions, structural constraints, or a mix of both. Readers will come away from the book with both a sense of the legal and policy challenges that confront antipoverty efforts, and with an understanding of the trade-offs inherent in different government approaches to dealing with poverty. New to the Second Edition: Updated coverage of the Affordable Care Act (Obamacare) Updated coverage of criminalization of poverty and efforts to decriminalize poverty Additional content for every chapter, with an emphasis on new cases, data, and sources Professors and students will benefit from: Three beginning chapters of general background on poverty numbers (data), social welfare (policy) and constitutional law (doctrine), followed by substantive chapters that can be selected based on professor interest, which makes the book easy to use even for 2-credit classes Emerging topics at the intersection of criminal law and poverty, markets and poverty, and human rights and poverty, in addition to traditional poverty law topics An author team with a combined experience of more than 100 years of teaching and practicing poverty law Highlights throughout the text to the racial and gendered history and nature of poverty in America An emphasis on presenting the most important topics accessibly, with careful editing and selection of excerpts to make the most of student and professor time A mix in every chapter of theory, program details, advocacy strategies, and the experiences of poor people

deep cleaning schedule for nursing home: L.A.Love Carlos Duval, 2014-05-16 Our central character, Liam Parry, encounters who he believes is the first love of his life, whilst still in the 6th form at a Liverpool Secondary School. The object of his affections, Angela Hughes, is a visiting Student Teacher. She is not much older than Liam, but such a union is not possible under the circumstances and Angela is unaware of Liams crush. Each goes their separate ways after the initial encounter. Angela leaves teaching and becomes a Freelance Journalist. Liam works in Mental Health Care for much of the story before his life changes, dramatically, career-wise. Liam takes you through a Roller Coaster ride through lifes ups and downs, before meeting Angela again, by chance. Perhaps fate had a hand in it. This second meeting kindles true romance. The book is laced with romance, humour and tragedy. Enjoy the ride.

deep cleaning schedule for nursing home: How To Understand the Mystery of Suffering. Feel Joy While Suffering. Make a Difference Wherever, Forever to You, My Love Mary Burns, 2008-07 My book does answer the questions on the cover about how to understand the mystery of suffering, how to feel joy while suffering, and how to make a difference wherever, forever. My spiritual director told me to write a journal. That journal has become, over several years, this book. In this book, I spread my life out to you and the world and say things about myself that I have not told even my best friends. My friend of forty-three years does not know some of what is in here.

deep cleaning schedule for nursing home: Challenging Cases in Palliative Care Felicity Dewhurst, Polly Edmonds, Suzie Gillon, Amy Hawkins, Mary Miller, Sarah Yardley, 2024-05-02 Palliative care has evolved rapidly in recent years. Not only is the field dealing with an increasingly elderly and multi-morbid population, it is also addressing a wider variety of complex diagnoses such as heart failure, renal failure, advanced lung disease, frailty, and dementia. Challenging Cases in Palliative Care is unique, as it uses examples of real-world cases from palliative care practices. It also includes expert commentary to support modern clinicians in managing the 'messiness' of clinical care, as well as the increasingly complex needs of patients today. As part of our Challenging Cases series, the cases in this book not only cover a range of physical and psychosocial problems seen in palliative care, they also reflect the core curriculum for UK speciality trainees. Each case brings together expert interpretation of the available evidence, management strategies, guidelines and best practice, while discussing complexities in clinical decision-making and controversies in approach.
