Understanding the EPA 608 Certification

The EPA 608 certification is a federally mandated credential required for technicians who maintain, service, repair, or dispose of equipment containing regulated refrigerants. These refrigerants include chlorofluorocarbons (CFCs), hydrochlorofluorocarbons (HCFCs), and hydrofluorocarbons (HFCs) commonly used in air conditioning and refrigeration systems. The certification is divided into four distinct types:

Types of EPA 608 Certification

Each type of certification corresponds to different refrigeration system categories and technician capabilities:

- **Type I:** Covers servicing small appliances containing five pounds or less of refrigerant.
