More than eighty years ago, a musical prodigy with a brilliant mind was born into a poor, uneducated, and abusive family in rural South Georgia. At three years of age, Fred Allen could play Mozart sonatas on the piano without missing a note. But in spite of his obvious talent, Fred's parents discouraged him from expressing his creativity and intelligence, even going so far as locking him away from the old piano in their home. Forced to fend for himself through his adolescent years, Fred knew that if he was ever to make something of himself, he would need to find a way to rise above his broken background. With incredible effort, and a few miracles along the way, Fred managed to do just that, eventually earning acceptance into The Julliard School in New York City. While simultaneously attending Juilliard, Union Theological Seminary, and Columbia University, he also began directing a local church choir, where he caught the attention of the music industry. During the musical revolution of the 1960s, Fred earned numerous Grammy nominations and built a growing reputation within the industry. But just as his new career was beginning to take off, Fred was faced with an impossible decision. His wife announced that she no longer wanted to raise their daughter in New York City and was heading home to the South. Fred had come so far from the pain and brokenness of his past, he couldn't imagine giving up everything just to return to his childhood home. Trying not to think about what could have been, Fred took a job as a high school music teacher in his hometown of Thomasville, Georgia, a community of only 30,000 people. Far from the executive suites of RCA and the allure of Broadway, Fred never could have imagined that his new role would not only transform his life but also change an entire community forever.

enzo macleod family tree: *How to Change Your Mind* Michael Pollan, 2019-05-14 Now on Netflix as a 4-part documentary series! "Pollan keeps you turning the pages . . . clear-eyed and assured." —New York Times A #1 New York Times Bestseller, New York Times Book Review 10 Best Books of 2018, and New York Times Notable Book A brilliant and brave investigation into the medical and scientific revolution taking place around psychedelic drugs--and the spellbinding story of his own life-changing psychedelic experiences When Michael Pollan set out to research how LSD and psilocybin (the active ingredient in magic mushrooms) are being used to provide relief to people suffering from difficult-to-treat conditions such as depression, addiction and anxiety, he did not intend to write what is undoubtedly his most personal book. But upon discovering how these remarkable substances are improving the lives not only of the mentally ill but also of healthy people coming to grips with the challenges of everyday life, he decided to explore the landscape of the mind in the first person as well as the third. Thus began a singular adventure into various altered states of consciousness, along with a dive deep into both the latest brain science and the thriving underground community of psychedelic therapists. Pollan sifts the historical record to separate the truth about these mysterious drugs from the myths that have surrounded them since the 1960s, when a handful of psychedelic evangelists inadvertently catalyzed a powerful backlash against what was then a promising field of research. A unique and elegant blend of science, memoir, travel writing, history, and medicine, *How to Change Your Mind* is a triumph of participatory journalism. By turns dazzling and edifying, it is the gripping account of a journey to an exciting and unexpected new frontier in our understanding of the mind, the self, and our place in the world. The true subject of Pollan's mental travelogue is not just psychedelic drugs but also the eternal puzzle of human

consciousness and how, in a world that offers us both suffering and joy, we can do our best to be fully present and find meaning in our lives.

enzo macleod family tree: Greta & Valdin Rebecca K Reilly, 2024-02-06 For fans of Schitt's Creek and Sally Rooney's Normal People, an irresistible and bighearted international bestseller that follows a brother and sister as they navigate queerness, multiracial identity, and the dramas big and small of their entangled, unconventional family, all while flailing their way to love. It's been a year since his ex-boyfriend dumped him and moved from Auckland to Buenos Aires, and Valdin is doing fine. He has a good flat with his sister Greta, a good career where his colleagues only occasionally remind him that he is the sole Maaori person in the office, and a good friend who he only sleeps with when he's sad. But when work sends him to Argentina and he's thrown back in his former lover's orbit, Valdin is forced to confront the feelings he's been trying to ignore—and the future he wants. Greta is not letting her painfully unrequited crush (or her possibly pointless master's thesis, or her pathetic academic salary...) get her down. She would love to focus on the charming fellow grad student she meets at a party and her friendships with a circle of similarly floundering twenty-somethings, but her chaotic family life won't stop intruding: her mother is keeping secrets, her nephew is having a gay crisis, and her brother has suddenly flown to South America without a word. Sharp, hilarious, and with an undeniable emotional momentum that builds to an exuberant conclusion, *Greta & Valdin* careens us through the siblings' misadventures and the messy dramas of their sprawling, eccentric Maaori-Russian-Catalonian family. An acclaimed bestseller in New Zealand, *Greta & Valdin* is fresh, joyful, and alive with the possibility of love in its many mystifying forms.

This Element ambitiously surveys fictional professors in texts marketed towards children. Professors are overwhelmingly white and male, tending to be elderly scientists who fall into three stereotypes: the vehicle to explain scientific facts, the baffled genius, and the evil madman. By the late twentieth century, the stereotype of the male, mad, muddlehead, called Professor SomethingDumb, is formed in humorous yet pejorative fashion. This Element provides a publishing history of the role of academics in children's literature, questioning the book culture which promotes the enforcement of stereotypes regarding intellectual expertise in children's media. The Element is also available, with additional material, as Open Access.

It is the first of a series of picture books written and made for grownups and designed to showcase leading New Zealand writers and artists working together in a collaborative and dynamic way. In High Wire the narrators playfully set out across the Tasman, literally on a high wire. Macleods striking drawings explore notions of home, and depict homeward thoughts and dreams. High Wire also enters a metaphysical place where art is made, a place where any ambitious art-making enterprise requires its participants to hold their nerve and not look down. Its a beautifully considered small book which richly rewards the reader and stretches the notion of what the book can do.

How were issues of cultural transfer and curatorial strategies dealt with in the extended 1960s - the era of pop? Art in Transfer in the Era of Pop juxtaposes issues and contexts approaching the concept and reception of Pop Art. Contributors from Europe and beyond weave a web that resists the notion of universalism, adding to art historian Piotr Piotrowski's horizontal art history. This volume avoids the historiographic stance where the US--Europe relationship appears to be a one-way affair. Instead, the reader is drawn into the history of the circulation and cross-pollination of ideas, the aesthetic practices and the various contexts that influenced them.
